AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of ,Aug.28,1947, USAF acft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., or Great Falls AFF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., Westover Field, Mass., or Fairfield-Suisun AFF, Calif. CANADA - Great Falls AFF, Mont., Brookley Field, Ala., McChord Field, Wash., Washington National Airport, D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO AND SOUTH AMERICA - March Field, Calif., MacDill Field, Fla., Kelly Field, Tex., or Brookley Field, Ala. CARIBBEAN - Brookley Field, Ala., Kelly Field, Tex., or MacDill Field, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C., Westover Field, Mass., Selfridge Field, Mich., or Brookley Field, Ala. HAWAII - Fairfield-Suisun AFF, Calif. EUROPEAN THEATER - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

✓ Indicates new or revised Special Notices

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force Fields have been changed to new designations by the Department of the Air Force General Orders No. 2, of January 13, 1948. The abbreviation "AFB" is for Air Force Base and the abbreviation "AF Aux." stands for Air Force Auxiliary Field.

✓ CORRECTIONS FOR AND ADDITIONS TO AIR FORCE T.O. 08-15-1: (I) Correct Canadian data as follows: (a) Page 5, Edmonton, Alta., GCA facility is in operation cont. during IFR or forecast IFR, daily from 1500 to 0000Z or on 30 minutes notice for practice runs on Channels A-B-C-D-G-H, 3475, 4890, 6640 kcs, receiving all HF.

(b) Page 6, Goose Bay, Lab., GCA facility operates continuously during IFR, for practice 1300Z-1600Z and 1700Z-2100Z, or on 45 min. call on Channels A-B-C-D and 4220, 4495, 6210, 4400, and 3105 kcs.

(c) Stephenville, N.F., Harmon Field, change name of field to Earnest Harmon AFB (accordance Department of the AF General Orders No. 2). GCA facility operates cont. during IFR, 1500Z-2000Z for practice on VHF Channels A-B-C-D and 3475,4890,6640, receiving also on 4495 and 6210 kcs.

(d) Vancouver ATC Area. In accordance with Canadian Department of Transport Information Circular No. 0/3/48 of January 8, 1948, the Vancouver Air Traffic Control Centre, effective Jan. 10, 1948, provides ATC service for aircraft within the following areas:

(1) Those portions of Green Airway #1 from Patricia Bay, B.C., Airport to 25 mi. W of Cranbrook, B.C. range station.

(2) Those portions of Amber Airway #1 from 25 mi. SE of Vancouver, B.C. range station to 25 mi. N of Port Hardy, B.C. range station.

(3) Those portions of Amber Airway #4 from Princeton, B.C. range station to 25 mi. S of Dog Creek, B.C. range station.

(4) Those portions of Red Airway #44 from the U.S.-Canadian Border to the intersection of the NE leg of Bellingham, Wash. range and the W leg of Princeton, B.C. range.

(5) Those portions of Blue Airway #32 from 25 mi. SE of Patricia Bay, B.C., range station to the intersection of the SE leg of Comox, B.C. range and the W leg of Vancouver, B.C. range (Lantzville Intersection).

(e) In addition to the above, the Vancouver ATC Centre provides ATC service for aircraft within a 25 mi. radius of Vancouver, B.C. range station.

(f) The following changes are required in accordance with Dept. of Transport Air Navigation Radio Aids of Jan. 1, 1948:

(1) Page 3, Kenora, Ont. Radio range class is SBRAZ; Sioux Lookout, Ont. radio range class is BRAZ.

(2) Page 5, Edmonton, Alta. control tower no longer operates on Channel A; Lethbridge, Alta. control tower operates on Channel B, in addition to frequencies previously published.

(3) Page 6, Gander, Nfld. control tower no longer operates on Channel B. Guards and transmits on 118.1 mcs in addition to other frequencies published. Range guards 3105, 3117.5, 4495, 6210 kcs.; Goose Bay, Lab. control tower no longer transmits on 3027.5 kcs. Tower guards 3105, 4220, 4495, 6210 kcs (as well as Channels A and B). Radio range guards 3105, 4495, 6210, 3117.5 kcs.

(4) Page 8, Dartmouth, N.S. control tower operates on Channel A and transmits on 3027.5 kcs, both in addition to frequencies now listed; Greenwood, N.S. control tower is in operation, transmits on 278 kcs, 116.1,126.18 mcs, guards 3105,4495,6210 kcs, 116.1,126.18 mcs. Operates 1200-2200Z and on one hour notice. Radio range guards 3105,4495,3117.5, 6210 kcs.

(5) Page 10, Montreal, Que., weather is broadcast from radio range at 10 and 40 minutes past the hour. N course of radio range is aligned at 159°.

(6) Page 12, Trenton tower operates also on Channel B; Toronto, Ont. tower transmits and guards 118.1 mcs in addition to frequencies now listed.

(g) NOTE TO AMC: Time of local weather broadcast should continue to be shown, but stations for which weather is broadcast should be deleted:

(1) Page 2, Armstrong, Ont.: Distance, stn to field: 2.7.

(2) Page 3, Armstrong, Ont.: Same change as above; Sioux Lookout: Radio range courses: 260°,311°,76°,131°.

(3) Page 4, Rivers, Man.: Control tower transmits on 3017.5 kcs also.

(4) Page 5, North Battleford, Sask.: Distance, stn to fld: 4.0; Penhold, Alta.: Station guards 3105,3117.5,4495,6210 kcs.

(5) Page 6,Argentia NAS,Nfld: Tower transmits on 126.18,140.58,142.7 mcs, as

well as other frequencies listed, but does not guard these frequencies. Radio range guards 3017.5,3105 and 4495 kcs.; Gander, Nfld: Delete identification of MO for H facility from Identification column. (Identification is correctly shown in remarks column). Delete weather broadcast for this facility. DF station operates on 3432.5 and 5672.5 kcs, in addition to frequencies now listed. Ground/air station VOAC operates on 6577, 3285,3248,6583,8538, 8554,11319,12776,6543,8486, and 333 kcs CW.; Goose Bay, Lab.: DF station on 6355, 3452.6, 4220, 2890 kcs, Channels A-B-C operate on 30 min. request. ILS on Channel X, approach bearing 348° operates continuously. Gnd/air station WYTR operates on 6355, 3452.5 kcs CW, 4220, 2890, 137.88 voice. VOAV on 2912, 6543, 8485,11306, and on 333,3285 6577,8554, 11319 on request; St. Andrews, Nfld: Class: BRAZ; Stephenville, Nfld: Tower guards 3105,3017.5, 4495, 6210 kcs. Range guards these frequencies also; Wesleyville, Nfld: Delete. No record of present operation this facility;

(6) Page 8, Dartmouth, N.S.: Tower and range guard 3105,3117.5,6210 kcs; Greenwood, N.S.: Control tower guards 3105,6210 kcs. Radio range guards 3105,3117.5, 6210 kcs.; Stephenville, Nfld: Same changes as for page 6.

(7) Page 9, Pennfield Ridge, N.B. Radio range courses: 168°,273°,359°,100°.

(8) Page 11, Pennfield Ridge, N.B. Change course alignment in accordance with Item No. 7.

(9) Page 12, Earlton Jct, Ont.: Class: BRA; Ottawa, Ont.: Class: SBRAZ; Porquis Jct, Ont.: Frequency: 212 kcs, Class: BRAZ; Toronto, Ont.: Bear. to field: 17°; Wiarton, Ont.: Class: BRAZ.

(10) Page 20, Abbotsford: Field elev. 180'; Comox, B.C.: Field elev. 79'. Guards 3105,3117.5,6210,30825,5037.5 kcs.; Cranbrook, B.C.: Weather broadcast :10 and :40; Vancouver, B.C.: Tower guards 116.1 mcs. also.

(11) Page 21, Penticton: Radio range courses: 156°,234°,330°,64°.

(12) Page 26, Clear Creek: Class: SBRAZ; London: Elev. 920'. Tower guards 3105,6210,3117.5 kcs. Class: SBRAZ; Sarnia: Weather broadcast :10 and :40. Class: SBRAZ; Toronto: Control tower transmits on 278 kc,118.1 mcs only. Guards 3105,3117.5, 6210 kcs. and 118.1 mcs.; Windsor: Elev. 620'.

(13) Page 6, St. John, Nfld: Delete. No record of facility.

(h) Canadian Department of Transport Information Circular No. 0/5/48 describes Amber Airway #1 as follows: From the intersection of the NW leg of Bellingham, Wash. range and the U.S.-Canadian Border, via Vancouver, B.C. range station; the intersection of the W leg of Vancouver, B.C. range and the SE leg of Comox, B.C. range (Lantsville intersection), the Comox, B.C. range station; Port Hardy, B.C. range station, Massett, B.C. range station to the intersection of the NW leg of Massett, B.C. range and the U.S.-Canadian Border.

(II) Correct page 34, by adding to Hill AFB, Utah Remarks: VHF/DF, see pages 96-97.

(III) Correct page 99, by deleting listing of FCC direction finder station at Minneapolis, Minn. (not yet installed), as this station will not be installed.

(IV) Correct pages 22 and 24, under Mitchel AFB, N.Y. by inserting: Operational Air Force GCA available, see page 86. Delete reference to ILS.

(V) Correct page 31, by showing the N leg of Lincoln radio range as 170°.

(VI) Correct listing under Pope AFB, N.C., by showing the radio range operating on 338 kcs only. Channel B is available at tower only.

(VII) Correct Chart Index pages throughout publication by showing column heading for "Bearing" under Station to Field as "Magnetic Bearing".

(VIII) Correct all references to AACS Airways Stations by changing to: "Military Airways Stations".

(IX) Correct pages 20 and 21, by showing the listing of Grays Harbor (Moon Island) as Aberdeen (Moon Island) with identification: ABW.

(X) Under Navy VHF Channels, add GUARD: 140.58 mcs. emerg.

✓ LOCATION IDENTIFIERS: See Special Notice page 58, under CIVIL SPECIAL NOTICES, for Location Identifiers.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D. C., for transmittal to the Civil Aeronautics Administration.

In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

✓ V.H.F. CHANNEL ASSIGNMENTS: Following are Navy assignments:

CHANNEL	NAVY FREQUENCY	CHANNEL	NAVY FREQUENCY
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	137.88	9	142.74
5	143.28	GUARD	140.58

RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, N.Y., INTERNATIONAL AIRPORT, N.Y., AND NEWARK AIRPORT, N.J.: La Guardia Field, N.Y., New York International Airport, N.Y., and Newark Airport, N.J., closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or constructions, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

USE OF AIRPORT UTILITY FREQUENCIES - 121.9 AND 121.7 MCS: The airport ground control frequencies of 121.9 mcs (standard civil channel) and 121.7 mcs (alternate channel) are provided to eliminate the frequency congestion caused by numerous radio contacts between the tower and taxiing aircraft and the tower and airport utility vehicles thus providing a clear VHF channel for arriving and departing aircraft. The ground control frequency is used for the issuance of taxi information, clearances, and any other contacts between the tower and aircraft or vehicles operating on the airport.

Landing aircraft should guard the appropriate ground control frequency (normally 121.9 mcs) as soon as the aircraft has cleared the active runway. At locations where a ground control frequency is not available or the aircraft is not equipped with the VHF ground control channel, the tower will handle all transmissions to aircraft on the ground over its low frequency channel (278 kcs or equivalent). Departing aircraft should communicate with the control tower on the appropriate ground control channel (121.9 or 121.7 mcs) for taxi and clearance information and should remain tuned to that frequency until the pilot is ready to request take-off clearance. At that time, the pilot should communicate with the tower on the appropriate airborne VHF channel. Further communication with the tower, if necessary, should be made on the latter frequency. Aircraft not VHF equipped should guard the tower low frequency channel (278 kcs or equivalent) for taxi information and take-off clearance.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the ATC clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers guard the private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs, in addition to towers' low frequencies.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.'

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

VISUAL-AURAL RANGE (VAR MONITORING): Only visual courses of VAR facilities are monitored continuously.

SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory, dated December 1, 1947, has gone to press. It is being mailed to all seaplane owners and all seaplane bases. Owners or base operators who are not already on the mailing list, may secure it upon request to the Office of Aviation Information, Attention: A-258, Civil Aeronautics Administration, Department of Commerce, Washington 25, D. C.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kcs. is identified as "tower", on the tuning control nameplates. This is not always correct as many towers transmit on frequencies other than 278 kcs. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting frequency when such frequency is other than 278 kcs. It is suggested that pilots use care and make certain that they are tuned to the transmitting frequency of the tower with which they desire to communicate.

✓ LOCATION IDENTIFIERS: The C.A.A. Federal Airways Manual of Operations II-B-4-2 entitled "Location Identifiers", now available, replaces the publication entitled "Identification". The new manual becomes effective March 1, 1948, and involves changes in almost all of the identifiers used to identify U.S. weather reports and for other teletype purposes. It further requires changes in all of the existing two-letter identifiers for radio ranges, localizers, and type "H" facilities in the U.S., its territories and possessions to three-letter identifiers.

All of the teletype changes involved are expected to be accomplished on March 1, 1948, however, the change-over program of radio ranges, localizers, and type "H" facilities will be accomplished in a gradual manner. Advance notices of these radio identification changes will be published in the Airman's Guide until all the changes have been accomplished.

In an effort to assist all concerned in becoming familiar with the new three-letter identifiers, the January, 1948, issue of the "Flight Information Manual" lists every location to which an identifier is presently assigned, immediately followed by both the current identifier and in parenthesis the identifier which will be placed in use on March 1, 1948, as the location identifier, and on or after March 1, 1948, as the radio facility identifier. Appropriate teletype notices to airmen will be issued covering changes in radio facilities identifiers.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elev.	Action Taken
West Plains, Mo.	Supplementary Wea.	36-44,91-52	1011	Begun
Southern Pines, N.C. (Knollwood Airport)	"	35-15,79-25	450	Inaugurated
Chama, N. Mex.	"	36-54,106-35	7859	Inaugurated
La Veta, Colo.	"			Inaugurated

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporary inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct Coast and Geodetic Radio Facility Chart No. 25, dated December 17, 1947, by showing the Santa Barbara, California Tower transmitting on and receiving on 121.9 mcs.

(2) Correct Coast and Geodetic Radio Facility Chart No. 15A, dated December 10, 1947, by showing the intersection of the SW course of the Moffett Navy Radio Range and the NW course of the Salinas VAR Radio Range (on request reporting point) identified as "Saratoga".

(3) Correct World Aeronautical Chart No. 77, dated March 4, 1947 and January 12, 1948, by showing maximum elevations of 5000-6000' instead of 3000-4000', at latitude 65°47' N, longitude 152°05' W, W part of Ray Mts.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 2, No. 2, dated January 1, 1948, by making the following corrections and additions to the Chapters listed below:

(1) CHAPTER I - "Aeronautical Facility Index (With Location Identifiers)":

	Facility	Type		Ident.
Page 3	Abernathy-Pulaski, Texas			(AHY)

(7) CHAPTER XIII - "Foreign Entry and Flight Requirements, Including Alaskan Requirements":

Pages 175 and 179, should be corrected by substituting the heading for Entry into Canada for that of Entry into Mexico and vice-versa.

(8) CHAPTER XIV - "Instrument Approach Procedures":

Page 229 Correct listing under Youngstown, Ohio, Min. Initial Appr. Alt. from the Direction and Radio Fix Indicated heading for the E leg to 4000' instead of 2200'.

Page 230 Correct listing under Amarillo, Texas, Glide Path Alt. over Marker, Outer heading, by changing 4700' to 5200'.

Page 232 Correct listing under Philadelphia, Pa., Dist. From Middle Mrkr to App. End of Rnwy-Ft. heading, by changing 3529' to 3500'.

Page 232 Under heading Transition _ to ILS, correct sub-headings by reversing Min. Alt. (Ft.) and Dist. (Mi.)

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off.

(b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AFF Regulation 100-4, dated March 4, 1944, and C.A.R. Digest or Manual 60).

(c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate that the ground visibility is less than 3 miles and a traffic clearance is necessary to enter the traffic pattern of airports within the control zone.

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of international notams is the C.A.A. Overseas-Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii; Anchorage, Alaska.

UNITED KINGDOM IMPLEMENTATION OF INTERNATIONAL NOTAM PROCEDURES: Effective January 1, 1948, United Kingdom implemented International Notam Procedures, and began broadcast of notams in accordance with plan set up in Dublin Chart, dated November 29, 1947, as amended by United Kingdom telegram of December 8, 1947, listing recent alterations to broadcast plan. Each notam broadcast will be repeated up to end of 24-hour period. Any notam broadcast will be repeated on fixed service channel on request made on that channel.

LONDON, ENGLAND: Pilots entering or operating within this area should be familiar with all notams available at the New York International Notam Office.

N.B. The British Government has reported several violations of local air traffic rules. Disciplinary action will be taken on future violations.

PRECAUTIONS BEFORE ENTERING GREECE: All air carriers and others concerned are advised to use designated International Air Routes in and out of Greece. All pilots should be briefed on international visual signals between aircraft as Greece has indicated they intend to shoot down all intercepted foreign aircraft that are not recognized or fail to comply with instructions when intercepted.

DANGER AREA IN THE VICINITY OF ENIWETOK ATOLL, PACIFIC OCEAN: Effective January 31, 1948, a Danger Area was established in the vicinity of Eniwetok Atoll, about 2400 miles WSW of Honolulu, Hawaii, by the Atomic Energy Commission. The Danger Area, which will be activated throughout the rest of the calendar year 1948, is described as follows:

"Beginning with a point at 10-15 N lat., and 160-35 E long., N along the meridian of 160-35 E long., to a point at 12-45 N lat., 160-35 E long., thence E along the parallel of 12-45 N lat., to a point at 12-45 N lat., and 163-55 E long., thence S along the meridian of 163-55 E long., to a point at 10-15 N lat., and 163-55 E long., thence W to the point of beginning." Because of the grave hazards resulting from tests of military weapons in this area it should be categorically avoided under all circumstances until further notice.

EL-ARISH AIRPORT, EGYPT DANGER AREA: Anti-aircraft and air firing practice is being conducted continuously day and night until further notice within an area of 25 mile radius centered on El-Arish Airport at lat. 31-00 N lat., and 33-50 E long. All aircraft must avoid this area.

PERUVIAN PROHIBITED AREAS: The President of Peru has decreed that flight is prohibited over the following zones: Callao - lat. 12-02, long. 77-16, to lat. 12-02, long. 77-08; to lat. 12-08, long. 77-08; to lat. 12-08, long. 77-17. Pisco - lat. 14, long. 76-28, to lat. 14, long. 76-14; to lat. 14-14, long. 76; to lat. 14-25, long. 76; to lat. 14-25, long. 76-28. Matarini - lat. 16-54, long. 72-15; to lat. 16-54, long. 72-05; to lat. 17-05, long. 72-05; to lat. 17-05, long. 72-15.

[redacted]:BIRMINGHAM-RADIO: VHF omni-directional rng without voice operates on test basis. Fac unmonitored, subject to interruptions, and not to be used for navigational purposes. Freq 116.3 mcs, ident. "BH".

BIRMINGHAM ARPT-RADIO: CAA ILS with approach from SW serving NE/SW rnwy placed in intermittent oper on test basis only Jan 27. Voice equipped lclzr lctd 650' from NE end NE/SW rnwy, ident ' BH", freq 110.3 mcs. Glide path lctd 600' NE of SW end NE/SW rnwy, freq 335 mcs. Middle mrkr lctd 3802' SW on center line extended from SW end NE/SW rnwy, keyed alternate dots and dashes; outer mrkr lctd 5.4 mi SW on center line extended from SW end of NE/SW rnwy, keyed two dashes per second. Fac unmonitored and not to be used for navigational purposes until flgt-checked. (2-7) FLD: Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR-plant S of fld has long taxi and parking strips resembling rnwys. Neon type SW approach lgt lane beginning SW end NE/SW rnwy and extending to the SW 1500', operated whenever lgt intensity is equivalent to that between dusk and dawn day or ngt regardless of weather conditions or when otherwise necessary or when requested. (2-12)

CENTRE ARPT: NNW/SSE strip closed. N side E/W strip rough. (10-14)

**CUSSETA, BCN SITE 34, NO-AG: Decomm Feb 3. (2-4)

**DAWES, BCN SITE 11, NO-AG: Decomm Feb 3.

**HOPE HULL, BCN SITE 27, NO-AG: Decomm Feb 3. (2-4)

JASPER-WALKER CO. ARPT: Land inside of bndry mrkrs. Avoid new strip-being graded. (10-14)

★MAXWELL AFB (MONTGOMERY)-RADIO: USAF grnd/air stn weather bdcast on 4765 kcs discont. (2-11) FLD: At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-RADIO: VHF omni-directional rng in cont oper on 113.1 mcs, ident "MS". Comm on test basis, fac unmonitored, subject to interruptions and not to be used for navigational purposes. (1-21) Auto. rng monitor. sys inop. (2-8)

**MOBILE-BATES FLD: Two 305' and one 319' obst lgtd twrs Rdo Stn WKRG erected 11 mi ENE (80° true) at lat 30-43-13, long. 88-03-34.5. (2-5) N/S rnwy lgts inop. Equip. on fld. (1-7)

MONTGOMERY-RADIO: VHF omni-directional rng comm on test basis, unmonitored, unattended and subject to interruptions, not to be used for navigational purposes. Ident "TDN ', freq 112.1 mcs. (12-8)

**TALLASSEE, BCN SITE 31, NO-AG:. Decomm Feb 3. (2-4)

TUSCALOOSA-VAN DE GRAAFF ARPT, SITE 59, FV-AG: Acft avoid extreme NW corner of fld in wet weather. (2-10)

[redacted]:DAVIS MONTHAN AFB (TUCSON): E fld closed-acft parked on rnwys. Blinding ceilometer W end fld between ends of NW/SE, E/W rnwys. Obst lgt inop on 75' pole SE of twr. Former taxi strips 12R and 30L are now open as Rnwy 12R-30L, to be used by lgt acft and rstd to day opers only. (2-11)

LUKE FLD (PHOENIX): Traffic direction indicator on 2nd hangar from N inop. (10-15)

PHOENIX-RADIO: Visual courses of VHF rng not monitored. (8-18) Freq 108.3 mcs, ident "PH".

PHOENIX: Inst training on Phoenix Rng between 5500' and 9500'.

PHOENIX-SKY HARBOR ARPT-RADIO: CAA ILS operating on experimental basis and unmonitored. (2-7) FLD: Lcl ngt flying acft must be equipped with 2-way rdo. Equip. near Rnwy 12. (10-3)

PICACHO BCN SITE 62, PH-EO: About Feb 20 will be converted from electric blinker to standard rot. 24" RPM airway bcn with 18" course lgts and flash. code red dash dot dash. (2-13)

PRESCOTT-RADIO: Courses grnd checked only. (1-29)

**TOLTEC, BCN SITE 5, PH-EO: Decomm Feb 8. (2-9)

WILLCOX: Danger area will be estab. effect Mar 10, 1948 for bombing from the surface up to and including an alt of 30,000' during daylgt and darkness. The area is bounded on the N by lat 32-14; S by lat 32-06-30; E by long. 109-39; W by long. 100-00-30.

WILLIAMS AFB (CHANDLER)-RADIO: USAF rng unreliable and to be used for training only. (2-3)

★[redacted] WINSLOW-RADIO: Stn now grds 3105,4495,6210,3117.5 kcs, 116.1 mcs. (2-3) Visual-aural rng operates unattended or without means of remote monitor. Freq 108.7 mcs, ident ' WO".

WINSLOW ARPT-RADIO: CAA ILS lclzr and glide path comm Dec 19 on an experimental basis, serving Rnwy 28. Approach heading 286°. Sys will operate without middle and outer mrkrs. Lclzr freq 110.3 mcs, ident. "WNW". Lctd 1450' WNW of WNW end of rnwy. Voice feature controlled from INSAC will be comm in near future. Glide path freq 335 mcs. Angle: 2.6°, lctd 900' WNW of ESE end of rnwy 390' right of rnwy centerline. Point of ctc 300' from rnwy end. (2-9)

YUMA CO. ARPT: Tetrahedron lgtd on req. (1-25)

[redacted]:BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (10-17)

EL DORADO-RADIO: VHF visual-aural rng shut down intermittently days, weather permitting, for repairs. (1-15)

FORT SMITH ARPT: W end NW/SE, N end NE/SW rnwys closed. (12-7)

HOT SPRINGS-MEMORIAL ARPT: Ctn-inten training. Use rnwys only. (10-23)

SEARCY MUN ARPT: Const. (10-3)

**TEXARKANA ARPT: 400' obst lgtd twr Rdo Stn KCMC erected 4.5 mi WSW (260° true) at lat 33-26-56, long. 94-04-04. (1-23)

[redacted]:ALAMEDA NAS: Maintain high approach on Rnwys 26L and 21. Hvy acft parked these areas. 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (10-3)

BAKERSFIELD-KERN CO. ARPT-RADIO: Compass lctr at CAA ILS middle mrkr site will be comm soon. (1-29) Date of comm being checked.

BOCA, BCN SITE 17A, SF-SL: Bcn inop. (9-22)

★BURBANK-LOCKHEED AIR TERMINAL-RADIO: CAA twr now equipped to transmit on and grd 121.9 mcs for mobile grnd traffic. (2-4) FLD: Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7, 15; left traffic Rnwys 25, 33. Approach lgts Rnwy 7 changed to red. Rnwy 13-31 closed (parked acft). No NG facs. (7-9)

★CASTLE AFB (MERCED)-RADIO: USAF homing fac lctd at lat 37-21-56, long. 120-34-02. (1-27) USAF VHF/DF stn rcvs on any freq from 100-156 mcs on req. (2-3) FLD: Use Rnwy 12-30 only-acft parked on landing mat. Approach lgts Rnwy 12-30 inop. (1-16).

COTATI OLF: Crash truck avail. at Santa Rosa NAAS on req. (10-3)

EL CAJON-GILLESPIE ARPT: Right traffic E take-offs, landings. (10-16)

EL CENTRO NAS: Avail. 0700 to 1800. Other hrs on 30 minutes prior notice. (10-3)

FAIRFIELD-SUISUN AFF (FAIRFIELD)-RADIO: USAF ILS inop. (12-12)

FALL RIVER MILLS-SHASTA SKY RANCH ARPT: Use gravel strip only. Lgt acft only during thaws. (10-3)

**FRESNO-FURLONG: Lat 36-48-50, long. 119-52-00. (11-8)

FRESNO-HAMMER FLD-RADIO: About Feb 20, CAA twr will be comm on 278 kcs, grding 3105,4495,6210,3117.5 kcs. (2-4) FLD: Traffic pattern 800'. Land according to tetrahedron. (12-5)

**FULLERTON ARPT: 750' obst lgtd twr Rdo Stn KFI erected 12.5 mi E (90° true) at lat 33-52-46, long. 118-00-48. (1-31)

**GLENDALE-GRAND CENTRAL ARPT: 145' obst lgtd twr Rdo Stn KKLA erected 4.8 mi (91° true) at lat 34-09-05, long. 118-11-46. (1-23)

★HAMILTON AFB (SAN RAFAEL)-RADIO: USAF grnd/air stn weather bdcast on 4765 kcs has been discont. (2-11) FLD: Extension to Rnwy 12 closed except in emerg. (10-16)

★INYOKERN NAF-RADIO: Ident of Navy FM on E course changed to two dashes Feb 1. FM on S course temp inop, ident will be changed to 3 dashes. (2-3)

JACKSON-AMADOR CO. ARPT: CLOSED (const). (1-22)

LONG BEACH ARPT-RADIO: Feb 10, CAA ILS comm on 30 day test basis. Middle mrkr operating without monitor fac. Lclzr lctd 980' NW of end and extended center line NW/SE rnwy. Freq 110.3 mcs. Voice facs from twr are avail. on lclzr freq and cont ident "HB" will be transmitted with a tone freq of 1020 cps except during voice transmissions. Glide path lctd 800' from SE end and 400' SW of center line of NW/SE rnwy. Outer mrkr keyed 2 dashes per sec, lctd 28,645' from SE end of NW/SE rnwy, middle mrkr keyed alternate dots and dashes, lctd 4041' from SE end NW/SE rnwy. Both mrkrs on extended rnwy center line. Mag approach bear. 302°. Outer mrkr compass lctr will be comm later on 242 kcs, lctd at outer mrkr site, ident. "H". (2-10)

LOS ALAMITOS NAS (LONG BEACH): Closed 1630 to 0800 except in emerg or by prior arrangement. Only Rnwy 22L open. Equip. on fld. (9-14)

CALIFORNIA:LOS ANGELES ARPT: Two 25' poles at arpt bndry within approach zone to Rnwy 29, unlgtd, unmrkd. Parked acft within approach zone to and parallel with S side Rnwy 29. Unlgtd oil derricks on approach to Rnwy 34. E/W rnwy S side fld avail. taxiing only. All landings, take-offs and taxiing rstd to paved areas. Rnwy 4-22 closed. Rnwy 11-29 avail. for day and ngt take-offs and day landings only. Equip. on fld days. (10-30)

★MARCH AFB (RIVERSIDE)-RADIO: USAF grnd/air stn weather bdcast on 4765 kcs discont. (2-11) FLD: Rnwy 7-25 closed-avail. on twr permission only. Inten instrument flying training in AT-6 type acft days Mon thru Fri. (12-22)

MATHER AFB (SACRAMENTO): Use rnwys only-mat unserviceable. (2-6)

McCLELLAN AFB (SACRAMENTO): Rnwy 4-22 closed (parked acft). Equip. and parked acft adj all rnwys and taxiways. Shoulders, unsurfaced areas unsafe. (4-23)

MERCED MUN. ARPT: Daylgt oper of bcn is to warn lcl trans acft of approaching airline acft. Approach lgts inop. (6-24)

•• MINERAL ARPT: Reinstated. Lat 40-20-30, long. 121-37-15. (11-6)

MOFFETT FLD NAS-LTA-HTA (MOUNTAIN VIEW): Fld on positive control. Multi-engine acft above JRB class use Rnwy 14L-32R only, except in emerg. N connecting taxiway closed to all traffic. (6-17)

MONTEREY PENINSULA ARPT: Right traffic Rnwys 24, 28, left Rnwys 6, 10. (10-3)

MUROC AFB-RADIO: USAF rng unreliable and should be used for homing and training only. (1-30) FLD: Lctd within a danger area. Closed to all trans acft except on written permission CG, Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to continue to fld. (1-30)

★OAKLAND-RADIO: Feb 5, VHF omni-directional rng placed in cont oper on experimental basis, flgt-checked and oper normal. Fac not monitored and no voice feature. Freq 116.3 mcs, ident. "OA". Stn lctn: lat 37-44-15, long. 122-15-00, bear. and dist, stn to Oakland Arpt: 92°, 1.7 mi.

★OAKLAND ARPT-RADIO: CAA ILS outer and middle mrkrs flgt-checked and comm Feb 7. Bndry mrkr decomm. Jan 26. FLD: Rock surface area adj to Rnwy 27R avail. small acft. Adhere to twr instructions. Maintenance facs avail. 0800 to 1800. 2-way rdo rqrd except acft may land for repairs or fuel on permission from arpt supt. Rnwy 6-24 avail. lgt acft only. Hvy acft use rnwys, taxi strips only. Arpt channel unmrkd day, ngt. Turf areas between all rnwys avail. for emerg use. (10-7)

ONTARIO INTERNATIONAL ARPT: Const-equip. on fld days until approx Feb 29. Ditches mrkd ngts. Use paved taxi strips and rnwys. (1-15)

RED BLUFF-BIDWELL ARPT: Ctc lgts unreliable. (11-24)

SACRAMENTO-SKY RANCH ARPT: Rnwy const. Land at own risk. Ngt flgt training until 2100 every ngt. (10-27)

SAN DIEGO-SPECIAL NOTICE: Pilots flying into lower Calif, Mex, must have Mexican Consular clearance into Mexico prior to flgt. Pilots not securing prior consular clearance will have their acft impounded upon landing in Mexico. For complete Mexico entry procedures see "Flight Information Manual"

SAN DIEGO: Ngt fighter training being conducted within the following described areas: (a) A sector of a circle with radius of 40 mi centered at lat 32-54-30, long. 117-07-24 extending clockwise between lat 32-20-00, long. 117-03-20 and lat 33-18-20, long. 117-37-30, excluding those portions which lie within the confines of civil airways and S of the U.S.-Mexico bndry. (b) A sector of a circle with radius of 40 mi centered at lat 32-54-30, long. 117-07-24 extending clockwise between lat 33-23-30, long. 117-29-30 and lat 32-50-30, long. 116-26-30 excluding those portions which lie within the confines of civil airways.

SAN DIEGO-LINDBERGH FLD: Right traffic Rnwys 27, 31; left traffic Rnwys 9, 13. Mass flgts of civil acft prohibited unless prior arrangement made with arpt mgr. (1-29)

SAN DIEGO NAS: Traffic circle oval in shape with left turns at 800'. Traffic pattern may be entered at any point at any angle not greater than 45°. Landing will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr.. Point Love is lctd 1-1/2 mi S of Hotel Del Coronado. Acft crossing air traffic lanes at North Island must be above 1500'. Acft will not fly over Coronado or Amphibious Training Base at an alt of less than 1500'. Multi-engine acft land on hvy duty rnwys, single-engine acft on asphalt mat. (6-3)

SAN FRANCISCO ARPT-RADIO: Feb 10, CAA ILS comm on experimental basis serving E/W rnwy with approach from E. Lclzr freq 109.5 mcs with ident "SF", transmitter lctd 220' from W end E/W rnwy. Glide path freq 332.6 mcs, transmitter lctd 550' from E end E/W rnwy and 625' N of rnwy centerline. Outer mrkr will be lctd 6.6 mi from E end E/W rnwy, keyed 2 dashes per second, inner mrkr will be lctd 4550' from E end E/W rnwy, keyed alternate dots and dashes. No bndry mrkr. Will oper cont. (2-10)

CALIFORNIA: SAN FRANCISCO ARPT: New taxiway open from Rnwy 10-28 to new outer apron to S taxiway. Green lgts across W end Rnwy 10-28 denote rnwy end. Do not attempt landing short of green lgts. Turf area closed. N taxiway open from CG intersection to E side Rnwy 18-36. E 1000' Rnwy 10-28 closed days. (2-9)

SAN MATEO-BAY MEADOWS ARPT: Rnwy 31 usable in all weather for acft up to 10,000 lbs. Use ctn on taxiways during winter. When taking off on Rnwy 31, make climbing turn of 45° to the right after crossing 19th Ave, but no lower than 200'. When landing, acft turn off rnwy toward nearest taxi strip. No taxiing back on rnwy. (10-3)

★SANTA BARBARA-RADIO: Bear. and dist, VHF rng stn to Santa Barbara Arpt: 77°, 1.6 mi. (1-30)

SANTA BARBARA ARPT: No rng, ctc lgts Rnwys 3-21, 15-33. (1-19)

VICTORVILLE AFB: Use only Rnwys 16L-34R, 7R-25L, 3R-21L. Fuel on written orders only. (1-15)

COLORADO:DENVER-RUSTON FLD: All rnwys except N/S closed-const. Equip. on fld days. (8-4)

DENVER-SKY RANCH ARPT: Right traffic Rnwys 26, 30, 36. (6-13)

★DENVER-STAPLETON AIRFLD-RADIO: CAA twr now equipped to transmit on and grd 121.9 mcs for mobile grnd traffic. (2-8)

DURANGO-CITY COUNTY ARPT: Equip. on fld. (10-13)

EAGLE INT. SITE 76, LA-DV: CLOSED (snow). (2-11)

GLADE PARK, BCN SITE 65, LA-DV: Soon, 24" rot. bcn showing 12 clear flashes per minute with red course lgts flash. char. ' 5" (dot dash dot) will be comm at lat 39-03-55, long. 108-44-50. (1-8)

GLENWOOD SPRINGS ARPT: CLOSED. Equip. on fld. (10-30)

GRAND MESA, BCN SITE 68, LA-DV: Soon, 24" rot. bcn showing 12 clear FPM with red course lgts flash. char "8" (dash dot dot dot) will be comm at lat 39-05-30, long. 108-13-24. (1-8)

★LA JUNTA-RADIO: Feb 12, adtnl VHF voice fac avail. on 111.1 mcs.

LA JUNTA ARPT: NE/SW rnwy lgts, 3 out W side and 7 out E side. NW/SE rnwy lgts, 3 out N side and 2 out S side. E/W rnwy lgts out. Approach lgts normal. All lgts expected to remain in this condition indefinitely. (9-9)

★LOWRY AFB (DENVER)-RADIO: USAF grnd/air stn weather bdcast on 4765 kcs has been discont. (2-11)

PUEBLO-RADIO: Soon VHF omni-directional rng will be comm on test basis. Fac will be interrupted at times for adjustment and installation of adtnl equip. Stn lctn: lat 38-11-36, long. 104-39-48. Elev 4938' MSL. Bear. and dist, stn to Pueblo Arpt: 346°, 3.5 mi. Freq. 112.1 mcs, ident. "PU". Associated INSAC lctd at Pueblo, Colo. Dec 14° E. Voice and monitor, equip. will be added later. (2-6) Date of comm being checked.

★PUEBLO ARPT-RADIO: Cl twr now transmits on 396 kcs, 119.5 mcs, grds 3105,4495,3117.5 •• kcs, 122.1 mcs. SHERIDAN CO. ARPT: N/S rnwy unsafe hvy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. Ctc Sheridan rdo for fld lgts. (12-12)

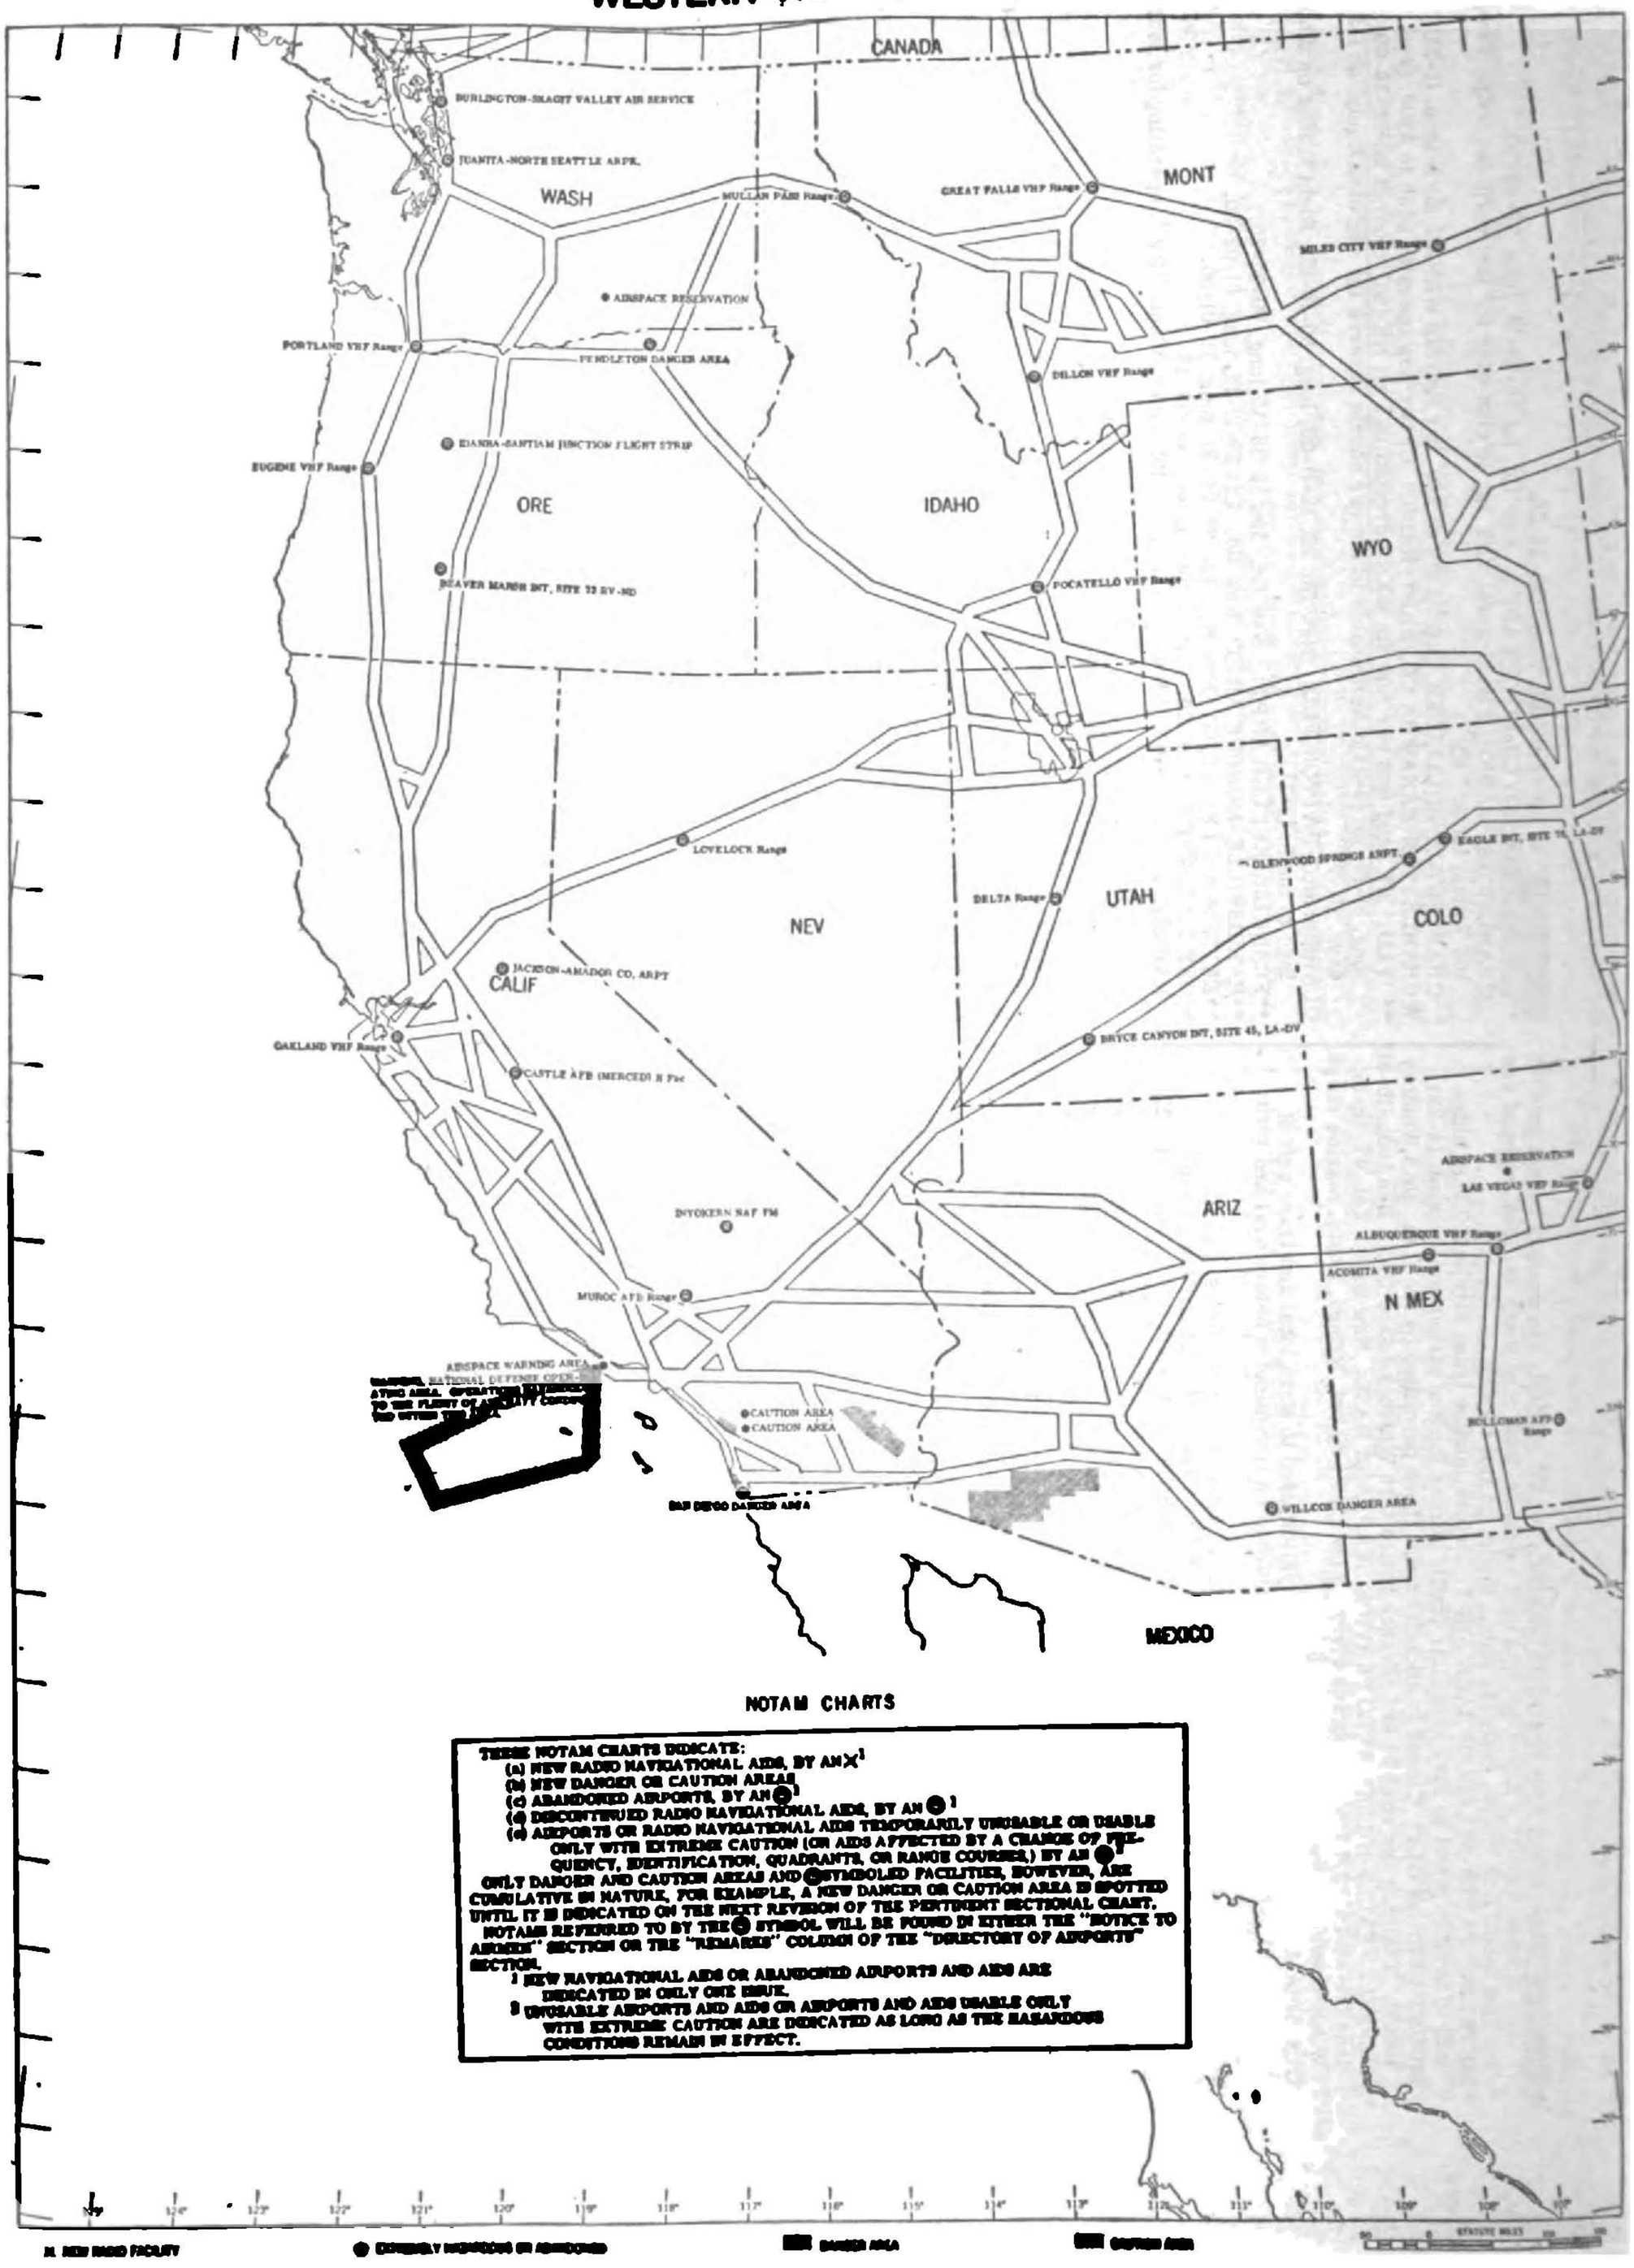
WESTERN NOTAM CHART



NOTAM CHARTS

THESE NOTAM CHARTS INDICATE:

(a) NEW RADIO NAVIGATIONAL AIDS, BY AN X[1]
(b) NEW DANGER OR CAUTION AREAS
(c) ABANDONED AIRPORTS, BY AN ⊖[1]
(d) DISCONTINUED RADIO NAVIGATIONAL AIDS, BY AN ⊖[1]
(e) AIRPORTS OR RADIO NAVIGATIONAL AIDS TEMPORARILY UNUSABLE OR USABLE ONLY WITH EXTREME CAUTION (OR AIDS AFFECTED BY A CHANGE OF FREQUENCY, IDENTIFICATION, QUADRANTS, OR RANGE COURSES,) BY AN ●[2]

ONLY DANGER AND CAUTION AREAS AND ⊖SYMBOLED FACILITIES, HOWEVER, ARE CUMULATIVE IN NATURE, FOR EXAMPLE, A NEW DANGER OR CAUTION AREA IS SPOTTED UNTIL IT IS INDICATED ON THE NEXT REVISION OF THE PERTINENT SECTIONAL CHART. NOTAMS REFERRED TO BY THE ⊖ SYMBOL WILL BE FOUND IN EITHER THE "NOTICE TO AIRMEN" SECTION OR THE "REMARKS" COLUMN OF THE "DIRECTORY OF AIRPORTS" SECTION.

[1] NEW NAVIGATIONAL AIDS OR ABANDONED AIRPORTS AND AIDS ARE INDICATED IN ONLY ONE ISSUE.

[2] UNUSABLE AIRPORTS AND AIDS OR AIRPORTS AND AIDS USABLE ONLY WITH EXTREME CAUTION ARE INDICATED AS LONG AS THE HAZARDOUS CONDITIONS REMAIN IN EFFECT.

• SPECIAL NOTICE

TO: All Notam Originators

SUBJECT: Unnecessary Or Too Lengthy Notams

Surveys have revealed that many notices to airmen tend to be too lengthy and even to cry "wolf". Thus, they aren't referred to as frequently as they should be and the increased safety of flight that should result from their issuance is frequently negated.

To increase reference thereto, and because of the serious teletype circuit congestion and space limitations in the Airman's Guide, Notams should be made as brief and concise as possible.

For these reasons, and because the Guide's primary function is to give general notice only of hazardous conditions or of data necessary for safe and efficient navigation, the following are examples of notices which will no longer be carried in the Guide and which should no longer be forwarded to its publishers:

1. Left hand traffic patterns.
2. Schedule of landing fees (the word FEE will be carried in the Remarks column for all airports which have landing charges for revenue-producing aircraft).
3. Transient pilots are required to register in the operations office upon arrival and prior to departure.
4. Land according to wind tee.
5. Wind sock located on hangar, etc.
6. Blinding 30,000,000 candle-power ceilometer installed.

AIRMAN'S GUIDE

DIRECTORY OF AIRPORTS
NOTICES TO AIRMEN

VOL. 2, NO. 25 . . . . . MARCH 2, 1948

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY

All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF. Most GCA units can transmit instructions directly on tower low frequency. Those identified by a (&) are forced to relay instructions on tower low frequency, if low frequency required.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously.

CAA GCA UNITS

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force

(N) " (with N in Type column) - Owned or leased totally by Navy

(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard

(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.

(N) " - Open to civilians but owned or leased wholly or in part by Navy

(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.

(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.

(P) " - Civil airport open to military aircraft. (See Note 2).

▲ " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A	- U.S. Air Force	I	- Intermediate	NG	- National Guard
C	- Commercial	M	- Municipal		
CG	- Coast Guard	N	- Navy	P	- Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
S-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet.

"h" indicates landing area is hard-surfaced or paved.

"aw" indicates allway field.

No differentiation is made between runways and strips as far as number of landing areas in field is concerned. In other words, two hard-surfaced runways and two sod surfaced strips will be listed as four runways.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

LIGHTS

L: Incomplete lighting, such as flood or strip lights, which are generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

(Any S combination in parenthesis indicates only part time or irregular attendant)

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS

(a) "91 oct." indicates fuel octanes available. "AF", or "Navy", preceding octane indicates USAF or Navy contract fuel available.

(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or strips.

(d) "TEMP INACT.NO FACS." indicates USAF and/or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.

(e) "USAF and NAVY TEMP INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however only commercial service is available.

(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.

(g) "Fld lights on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.

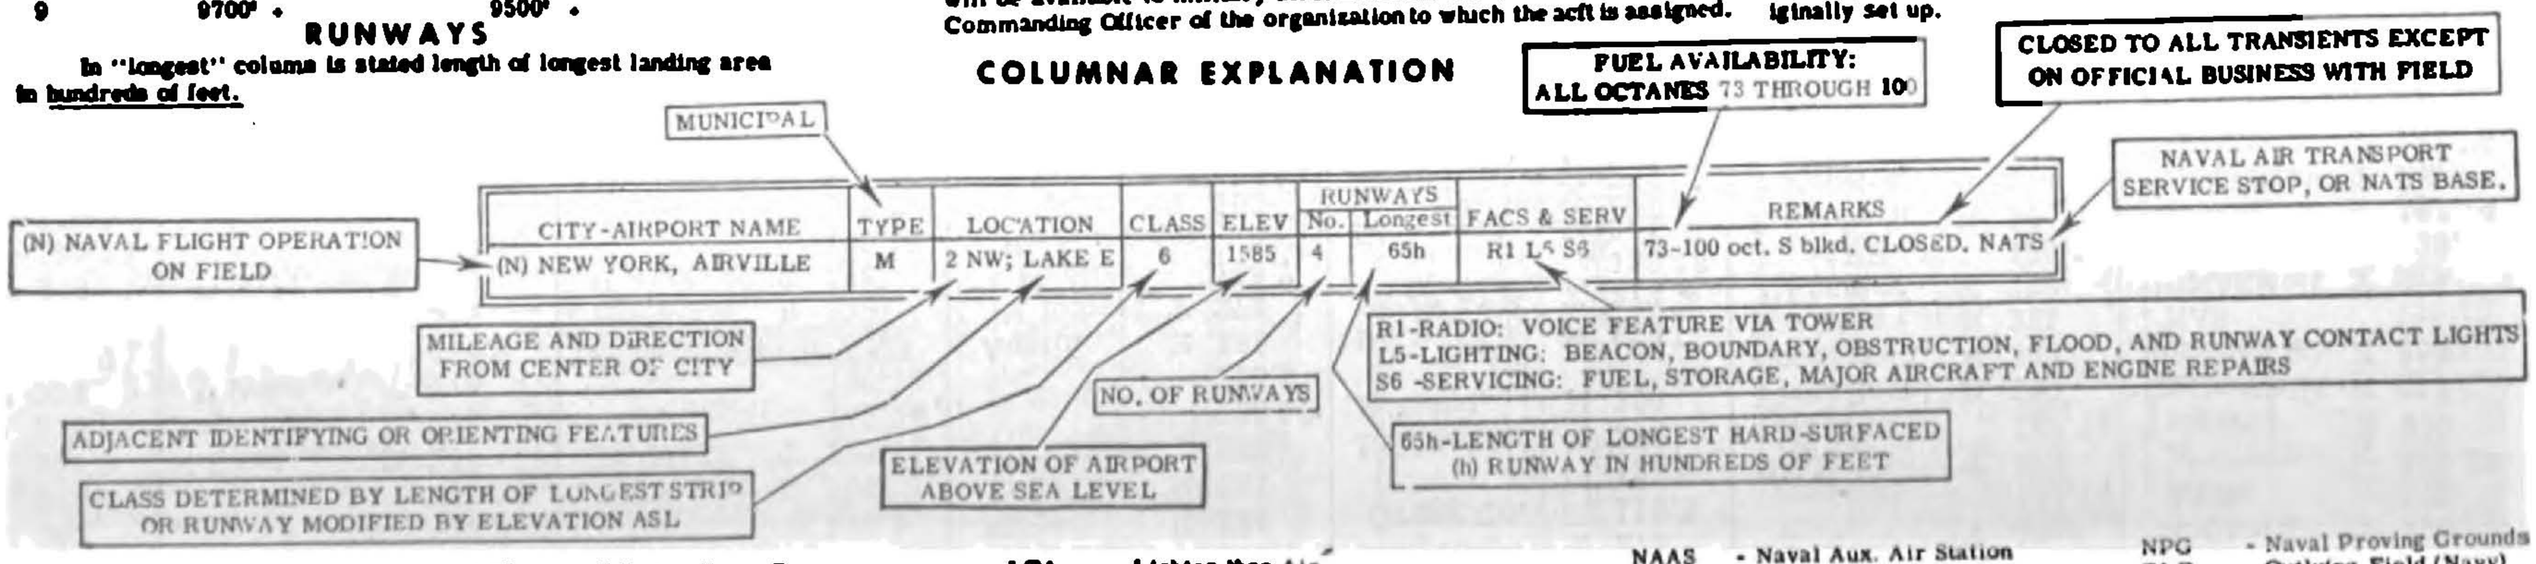
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, LS-ID" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Army)" or "(Formerly Navy)": These former Army and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION



AIRPORT NAME ABBREVIATIONS

AFB - U.S. Air Force Base
AFF - U.S. Air Force Field
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux. Air Facility
NAAS - Naval Aux. Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

NOTICES TO AIRMEN

SPECIAL NOTICES

AIR FORCES SPECIAL NOTICES

✓ AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, U.S.A.F., as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau thru the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

✓ AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 26, 1947, U.S.A.F. aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA & AZORES - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass. ALASKA - McChord AFB, Wash., or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y., Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass., or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont., Brookley AFB, Ala., McChord AFB, Wash., Washington National Airport, D.C., Selfridge AFB, Mich., or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, & SOUTH AMERICA - March AFB, Calif., MacDill AFB, Fla., Kelly AFB, Tex., or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala., Kelly AFB, Tex., or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, & NORTH IRELAND Washington National Airport, D.C., or Westover AFB, Mass. NOVA SCOTIA & NEWFOUNDLAND - Washington National Airport, D.C., Westover AFB, Mass., Selfridge AFB, Mich., or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

✓ Indicates new or revised Special Notices

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force Fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation AF Aux. stands for Air Force Auxiliary Field and the abbreviation AFB is for Air Force Base.

✓ POLICY ON CONTROL TOWER PROCEDURE: Base Commanding Officers at bases where the tower is operated by CAA will discontinue requesting the tower to determine the highest rank aboard incoming aircraft. This action is taken in an attempt to curtail the congested communications situation and at the request of the Civil Aeronautics Administration. In case of VIP, the desired information will be transmitted from point of departure to destination in the flight plan.

✓ CORRECTIONS FOR AND ADDITIONS TO U.S.A.F. T.O. 08-15-1:

(I) Correct page 32, by changing AN/CPN-6 (YM) Beacons (X-Band) Domestic, by showing the code for Westover AFB radar beacon as 2-1-2.

(II) Correct page 26, by deleting the Remarks under Selfridge AFB, Mich., as follows: ILS on Channel X, mag. heading 184°, for training only.

(III) Correct page 50, by showing Turner AFB, Albany, Ga. control tower also guarding 3117.5 kcs.

(IV) Correct page 114, by showing title of item C as follows: "Clearance From Non-Military Bases".

(V) Correct listing under Van Nuys Metropolitan Airport, by showing fuel as ABC.

(VI) Correct listing under Turner AFB, Ga, by listing as double (A) field.

(VII) Correct page 38, by showing control tower at Richmond (Byrd), Va. transmitting on 278 kcs, rather than 398 kcs.

(VIII) Correct Canadian data as follows:

(a) Page 5, Edmonton, Alberta: VHF direction finder is in continuous operation on Channel D and 139.32; Channels A and B avail. on request. An AN/CPN-6 (YM) radar beacon is in continuous operation, identification 2-2-2, bearing and distance to field 335° Mag., 0.5 miles. GCA facility operates continuously during IFR, for practice 1500Z to 0001Z and on Saturdays from 1500Z to 1900Z; or on 30 minute call at other times.

(b) Page 10, Add to Montreal: RCAF gnd/air station at Dorval Airport on 6240, 3202.5, 4400 kcs. operating 1230Z to 0030Z daily (and on request).

(c) Page 22, Westchester Co.: Show ILS on Channel X.

(d) Page 34, Boise Air Terminal: ILS with voice.

(e) Pages 26,27,39, Charleston (Kanawha): Hours of operation of tower 0830-2000.

(f) Page 42, Radio range class of Smoky Hill AFB is BMRLZ with WB at 29 mins. past hour.

(g) Page 46, Prescott radio range guards 3105,4495,3117.5, 6210 kcs.

(h) Page 50, Myrtle Beach radio range and control tower deleted.

(i) Page 54, Baton Rouge, delete "No voice on 347 kcs" and show weather broadcasts at :15 and :45, and station guarding 3105,4495,6210,3117.5 kcs.

(j) Page 64, Phoenix (Sky Harbor) control tower guards Channels A and B.

(k) Page 69, Ontario tower hours of operation 0800-1600.

(IX) Correct page 59, under Barksdale AFB, La., by deleting notice that radio range is unreliable.

(X) Correct page 41, under Memphis Arpt, Tenn., by deleting notation that control tower is inoperative.

(XI) Correct page 5, under Augusta radio range by showing the SW course as 46°.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the C.A.A. In accordance with Aviation Circular Letter No. 98-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: Following are Navy assignments:

CHANNEL	NAVY FREQUENCY	CHANNEL	NAVY FREQUENCY
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	137.88	9	142.74
5	143.28	GUARD	140.58

RESTRICTIONS ON NAVAL AIRCRAFT AT LAGUARDIA FIELD, INTERNATIONAL AIRPORT, AND NEWARK AIRPORT: La Guardia Field, N.Y., New York International Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or constructions, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

DIRECTORY AIRPORT NAME CHANGES: Air Force and Navy fields (normally listed under airport name rather than city name) released by the services as surplus to their needs and established as civil fields are carried under the heading of "New Airports or Fields out of Alphabetical Alignment" until the Airport Directory is retyped.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

AIR RESCUE SERVICE: Headquarters, Air Rescue Service, Air Transport Command, U.S.A.F., has issued the following memorandum to all civil pilots:

"Air Rescue Service is one of the services of the Air Transport Command, U.S.A.F. Although it is military, its aid is available to you 24 hours per day in all parts of the U.S. Its equipment is such that once it is alerted, besides conducting a search for you, it can furnish you aid by parachuting doctors to your assistance, if immediate medical aid is needed, and by employing specially equipped ground parties which can traverse any terrain to reach you.

"With your help, this specialized equipment and personnel can more effectively come to your aid. Too often when you are reported missing, valuable time is lost in searching for you and bringing aid to you because Air Rescue Service has no idea of your whereabouts, or there are too many probable areas in which to conduct the search. Thus, you are deprived of expert rescue facilities during the critical period following your misfortune. The simplest way to overcome this biggest disadvantage to you is to file a flight plan with Civil Aeronautics Administration, regardless of the weather along your proposed flight path. If CAA facilities are not available, leave a flight plan with a responsible party at the point of departure. This flight plan should include your name, aircraft type and number, your route, your destination, and when your propose to land there (See Part 60, Civil Air Regulations). Two things to remember about a flight plan: Once you file it, follow it! When you land, close it with the nearest CAA Communications Station! If you do these things, there is less chance of your becoming an incident, either 'actual' or 'false'. By failing to close your flight plan, you will become a false incident and may thus deprive someone who really needs assistance from getting it.

"In order to become more fully informed about the work of Air Rescue Service and how it can help you in distress, you are invited to visit the nearest Air Rescue Service Unit and get acquainted".

CIVIL USAGE OF MILITARY FIELDS: U.S.A.F. and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or state or local law enforcement officer upon the request of such inspector or enforcement officer.

AIRSPACE RESERVATIONS: The President of the United States by Executive Order 9925, dated January 17, 1948, created airspace reservations over the Atomic Energy Commission's projects at Oak Ridge, Tennessee; Richland, Washington; and Santa Fe, N.M. All aircraft flights over the following described areas except in the interest of national defense or by authority of the U.S. Atomic Energy Commission are prohibited until the aforesaid Executive Order is cancelled:

(a) Clinton Engineering Works, Oak Ridge, Tennessee, beginning at lat. 36-00-25, long. 84-07-05; thence to lat. 35-51-35, long. 84-16-25; thence to lat. 35-52-10, long. 84-24-15; lat. 35-55-45, long. 84-29-30; thence to lat. 36-05-05, long. 84-13-30; thence to lat. 36-00-25, long. 84-07-05, the point of beginning.

(b) Hanford Engineer Works, Richland, Washington, beginning at lat. 46-33-40, long. 119-13-00; thence to lat. 46-20-00, long. 119-13-13; thence to lat. 46-18-06, long. 119-30-00; thence to lat. 46-26-00, long. 119-47-25; thence to lat. 46-40-45, long. 119-47-28; thence to lat. 46-46-50, long. 119-33-35; thence to lat. 46-46-50, long. 119-28-16; thence to lat. 46-33-40, long. 119-13-00, the point of beginning.

(c) Los Alamos Project, Santa Fe, N.Mexico, beginning at lat. 36-00-00, long. 106-04-00; thence along the Rio Grande River to lat. 35-45-00, long. 106-15-00; thence to lat. 35-45-00, long. 106-30-00; thence to lat. 36-00-00, long. 106-30-00; thence to lat. 36-00-00, long. 106-04-00, the point of beginning.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission field offices, or before any CAA flight examiner, who has been designated by the FCC to issue the permits, proves he is a United States citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorication then and there.

FCC offices are listed under United States Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports.

The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months, the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded.

To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers.

1. Discontinue all unnecessary low flying.
2. When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas.
3. Re-route channels of approach and departure to avoid residential and business districts whenever possible.
4. If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum.
5. Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE OPERATIONS: Because of the possibility of local ordinances or restrictions prohibiting seaplane operations in resort or congested areas, the Administrator has issued the following advice to seaplane operators:

"1. Take off as far out from the shore as possible.
2. Cut the takeoff run as short as safety permits.
3. Fly high enough to avoid criticism from residents below, or arrange the flight plan so that you pass over as few houses as possible.
4. Avoid unnecessary 'gunning' or racing of the engine.
5. Explain carefully to those who complain what you are doing to make your airplane a good neighbor.

In the CAA-Federal-Aid Airport program, we are promoting the use of seaplanes by assisting communities in establishing inexpensive docking and servicing facilities. In view of the high utility value of the seaplane or amphibian, we believe this to be a definite step in the advancement of personal flying in general. Hence, if we are to find acceptance of such facilities, it is up to those pilots who now operate seaplanes to assist us to the utmost by safe and considerate operation of their aircraft".

N.B. The Administrator's admonition was occasioned by numerous complaints received from lake-side residents and vacationists.

USE OF AIRPORT UTILITY FREQUENCIES - 121.9 & 121.7 MCS.: The airport ground control frequencies of 121.9 mcs (standard civil channel) and 121.7 mcs (alternate channel) are provided to eliminate the frequency congestion caused by numerous radio contacts between the tower and taxiing aircraft and the tower and airport utility vehicles thus providing a clear VHF channel for arriving and departing aircraft. The ground control frequency is used for the issuance of taxi information, clearances, and any other contacts between the tower and aircraft or vehicles operating on the airport.

Landing aircraft should guard the appropriate ground control frequency (normally 121.9 mcs) as soon as the aircraft has cleared the active runway. At locations where a ground control frequency is not available or the aircraft is not equipped with the VHF ground control channel, the tower will handle all transmissions to aircraft on the ground over its low frequency channel (278 kcs or equivalent). Departing aircraft should communicate with the control tower on the appropriate ground control channel (121.9 or 121.7 mcs) for taxi and clearance information and should remain tuned to that frequency until the pilot is ready to request take-off clearance. At the time, the pilot should communicate with the tower on the appropriate airborne VHF channel. Further communication with the tower, if necessary, should be made on the latter frequency. Aircraft not VHF equipped should guard the tower low frequency channel (278 kcs or equivalent) for taxi information and take-off clearance.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges.

If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers guard the private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs, in addition to towers' low frequencies.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kcs is identified as "tower", on the tuning control nameplates. This is not always correct as many towers transmit on frequencies other than 278 kcs. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting frequency when such frequency is other than 278 kcs. It is suggested that pilots use care and make certain that they are tuned to the transmitting frequency of the tower with which they desire to communicate.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

VISUAL-AURAL RANGE (VAR) MONITORING: Only visual courses of VAR facilities are monitored continuously.

RADAR BEACONS: The radar beacon is an electronic beacon designed to serve as an aid to aircraft navigation for such aircraft as are equipped with proper radar equipment. Its purpose is somewhat similar to ordinary low frequency radio ranges, but radar beacons furnish more information. From a radar beacon signal, the radar operator of an aircraft can obtain both the range and azimuth of the beacon. The signal is also coded, so the particular beacon can be identified by reference to a chart or radar beacon list. Thus, the radar operator can obtain rapidly a navigational "fix". Microwave beacons transmit only when interrogated by a special radar pulse length reserved for this function alone.

The essential difference between a radar and a radar beacon is that, unlike the radar, which depends on a reflection of its own energy to determine the existence and position of an object, the radar beacon is made up of a receiver -transmitter combination which sends out a coded signal when actuated or "triggered" by a radar signal of the proper frequency in order to receive the radar beacon signals "triggered" by the radar set.

An advantage of radar beacon is that a single beacon in an area will enable aircraft to navigate under all weather conditions if fitted with the necessary radar interrogating equipment, and at a much greater range than radar alone.

"Racon List, Book I", Hydrographic Office Publication No. 520, gives location, code, operating agency, and all information necessary to use these radar beacons.

BONE-SHAPED (DUMB-BELL) FAN MARKERS: The bone-shaped fan markers have been commissioned primarily for approach control purposes as they provide a more definite holding pattern being only 1-1/2 miles wide through the center of the pattern instead of 3 miles as in the elliptical shaped fan marker. Eventually all approach control fan markers will be bone-shaped. In some cases fan markers taken over from other agencies, especially the Navy, are not used for approach control purposes even though they have the bone-shaped pattern which will be retained.

INSTRUMENT LANDING SYSTEM (ILS) APPROACHES: Effective March 15, 1948, pilots are requested to give advance information to Air Traffic Control when planning to make an ILS approach, upon reaching the reporting point preceding the holding fix at airport of intended landing. This will permit assignment to the proper holding pattern and eliminate unnecessary delays in landing. Failure to use this procedure, however, will not preclude the pilot's right to request an ILS approach after reaching the holding point if weather conditions or other factors make such request advisable.

INSTRUMENT APPROACH LIGHT SYSTEMS: Normally neon approach light systems will be operated regardless of the runway being used whenever the light intensity is equivalent to that between dusk and dawn, day or night, regardless of weather conditions or when otherwise necessary or requested.

ON-REQUEST REPORTING POINTS: Delete Crystal City Intersection (S course of St. Louis and SW course of Scott Field Radio Ranges) as an on-request reporting point.

Add Waterloo Intersection (Intersection of S course of St. Louis and N course of Advance Radio Ranges) as an on-request reporting point.

"WLX" has been assigned as location identifier for the Waterloo Intersection.

Add Crib Intersection (Intersection of SE course of Glenview (Navy), Ill. and W course of South Bend, Ind. Radio Ranges) as an on-request reporting point.

"DUK" has been assigned as location identifier for the Crib Intersection.

REDESIGNATION OF CIVIL AIRWAYS: Effective March 15, 1948, Part 600 of the Regulations of the Administrator will be amended to read in whole or in part as follows:

1. Green #3 (San Francisco, Calif., to New York, N.Y.). From the intxn of the NW leg of San Francisco and the SW leg of Fairfield-Suisun, via San Francisco range station . . .

2. Amber #4 (Brownsville, Tex., to Minot, N.D.). . . Intxn of the N leg of Fort Worth, and the S leg of Oklahoma City; Oklahoma City range station; the intxn of the E leg of Oklahoma City and the SW leg of Tulsa . . .

3. Amber #7 (Key West, Fla., to Caribou, Me.) From Key West, Fla. range station, via the intxn of the NE leg Key West and the SW leg Homestead; Homestead range station; Miami range station . . .

4. Red #1 (Portland, Ore., to Kansas City, Mo.). . . Denver range station. From the Denver VHF range station via the intxn of the E leg of Denver VHF and the NW leg of Thurman, Colo. VHF; Thurman VHF range station; Goodland, Kans. VHF range station; Hill City, Kans. VHF range station; the intxn of the E leg of Hill City VHF and the NW leg of Waldo, Kans. VHF; Waldo VHF range station; Salina, Kans. VHF range station; Topeka, Kans. range station, to the intxn of the E leg of Topeka, Kans. VHF and the NW leg of Kansas City, Mo.

5. Red #8 (Altoona, Pa., to Wilkes-Barre, Pa.). From Brookville non-directional radio beacon via the intxn of the SW leg of Elmira, N.Y., and the W leg of Williamsport, Pa.; Williamsport, Pa. range station . . .

6. Red #18 (Indianapolis, Ind., to Washington, D.C.). From the intxn of the E leg of Indianapolis, Ind. and the NW leg of Cincinnati, Ohio, via Cincinnati, Ohio range station . . .

7. Red #22 (U.S.-Canadian Border to Rochester, N.Y.). From the intxn of the W leg of Buffalo, N.Y., and the U.S.-Canadian Border, via Buffalo, N.Y. range station; the intxn of the NE leg of Buffalo, N.Y., and the NW leg of Rochester, N.Y., to Rochester, N.Y. range station.

8. Red #30 (Mobile, Ala., to Jacksonville, Fla.) From Mobile, Ala. range station via Crestview, Fla. range station; the intxn of the E leg of Crestview and the NW leg of Tallahassee; the Tallahassee range station; to Jacksonville range station.

9. Red #31 (Cheyenne, Wyo., to Minneapolis, Minn.). . . Watertown, S.D. range station; Wilmar, Minn. range station; to the intxn of the E leg of Wilmar, Minn., and the NW leg of Minneapolis, Minn.

10. Red #51 (El Paso, Tex., to U.S.-Mexican Border). From El Paso, Tex. range station via Sierra Blanca, Tex. VHF range station; Marfa, Tex. VHF range station; the intxn of the SE leg of Marfa, Tex. VHF range station and the NW leg of Hot Springs, Tex. VHF range station; Hot Springs, Tex. VHF range station; to the intxn of the SE leg of Hot Springs VHF and the U.S.-Mexican Border.

11. Red #65 (Oceanside, Calif., to Blythe, Calif.) From Oceanside, Calif. non-directional radio beacon, via a point at lat. 33-07-00, long. 116-36-00, to a point at lat. 33-44-30, long. 115-21-30.

12. Red #66 (Santa Barbara, Calif., to Los Angeles, Calif.). From Santa Barbara, Calif. range station to Newhall, Calif. range station.

13. Red #67 (Crestview, Fla., to Dothan, Ala.). From Crestview, Fla. range station to Dothan, Ala. range station.

14. Blue #3 (Mobile, Ala., to Lafayette, Ind.). . . Terre Haute, Ind. range station; the intxn of the N leg of Terre Haute, Ind. and the SW leg of Lafayette, Ind. to Lafayette, Ind. range station.

15. Blue #5 (Galveston, Tex., to Wichita, Kans.). . . Houston, Tex. range station; the intxn of the NW leg of Houston, Tex., and the SE leg of Bryan, Tex.; Bryan, Tex. range station; Waco, Tex. range station . . .

16. Blue #28 (Charleston, S.C., to Spartanburg, S.C.). From Charleston, S.C. range station, via the intxn of the NW leg of Charleston, S.C., and the SE leg of Columbia, S.C.; Columbia, S.C. range station; the intxn of the W leg of Columbia, S.C., and the SE leg of Spartanburg, S.C., to the Spartanburg, S.C. range station.

17. Blue #34 (Little Rock, Ark., to Tulsa, Okla.). From a point at lat. 35-27, long. 94-00, via Ft. Smith, Ark. Airport; Muskogee, Okla. Airport to Tulsa, Okla. range station.

18. Blue #53 (Providence, R.I., to Hartford, Conn.). From the intxn of the SW leg Boston Mass. and the SE leg Hartford, Conn., to Hartford, Conn. range station.

19. Blue #54 (Salinas, Calif. to Oakland, Calif.). From Salinas, Calif. VHF range station, to Evergreen, Calif. non-directional radio beacon.

REDESIGNATIONS OF RADIO FIXES: Effective March 15, 1948, Part 601 of the Regulations of the Administrator will be amended to read in whole or in part as follows

1. Green #2 (Seattle, Wash., to Boston, Mass.). . . Rochester, N.Y. range station; Utica, N.Y. range station; Albany, N.Y. range station; Westfield range station; the intxn of the NE leg of Hartford, Conn., and the SE leg of Westfield, Mass. . .

2. Green #3 (San Francisco, Calif., to New York, N.Y.). . . Moline, Ill. range station; the intxn of the W leg of Chicago, Ill., and the SE leg of Rockford, Ill.; Joliet, Ill. range station . . .

3. Green #5 (Los Angeles, Calif., to Boston, Mass.). . . Intxn of the SE leg Baltimore.

Md., and the SW leg Millville, N.J.; the intxn of the SE leg Newark, N.J., and the SW leg of Mitchel, N.Y.; the intxn of the E leg of La Guardia, N.Y., and the NE leg of Mitchel; the intxn of the SE leg Hartford, Conn., and the SW leg of Boston, Mass.

4. Amber #1 (U.S.-Mexican Border to Nome, Alaska). San Diego, Calif. range station; Long Beach, Calif. range station; Bakersfield, Calif. range station; Fresno, Calif. range station; the intxn of the SE leg Stockton, Calif., and the NW leg Fresno, Calif.; Evergreen, Calif. marker station; Williams, Calif. range station . . .

5. Red #10 (Trinidad, Colo., to Charleston, S.C.). Wichita Falls, Tex. range station; the intxn of the S leg of Ft. Worth, Tex., and the W leg of Dallas, Tex.; Dallas, Tex. range station . . .

6. Red #11 (Tulsa, Okla., to Boston, Mass.). . . Evansville, Ind. range station; the intxn of the NE leg of Westover, Mass., and the E leg of Boston, Mass.

7. Red #13 (Sunbury, Pa., to Boston, Mass.). Wilkes-Barre, Pa. range station; Stewart Field, N.Y. range station; New Hackensack, N.Y. range station; Hartford, Conn. range station; the intxn of the W leg of Providence, R.I., and the SW leg of Boston, Mass. range station.

8. Red #20 (Lansing, Mich., to Chincoteague Island, Va.) Akron, Ohio range station; Martinsburg, W. Va. range station; the intxn of the NW leg of Washington, D.C., and the NE leg of Martinsburg, W. Va.; the intxn of the SE leg of Washington, D.C., and the NE leg of Patuxent River, Md.; the intxn of the SE leg of Washington, D.C., and the E leg of Chincoteague, Va.

9. Blue #3 (Mobile, Ala., to Lafayette, Ind.). Dothan, Ala. range station.

10. Blue #5 (Galveston, Tex., to Wichita, Kans.). Galveston, Tex. range station; the intxn of the NW leg of Houston, Tex., and the NE leg of Richmond, Tex.; the intxn of the NE leg of Ft. Worth, Tex., and the N leg of Dallas, Texas.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Latitude, Longitude	Elev.	Action Taken
Deer Park, Washington	SW			Discontinued
Kansas City, Mo.	Rawins			Discontinued
Red Bank, N.J.	Raobs			Inaugurated
Schenectady, N.Y. (Schenectady Co. Airport)	Hourly	42-51, 73-56	382'	Inaugurated
Springfield, Ohio (Mun.Arpt.)	SW	39-51, 83-50		Inaugurated
Salina, Utah (Salina-Gunnison Airport)	SW	39-02, 111-50		Inaugurated

✓ **AMENDMENTS TO PUBLISHED MINIMUM ENROUTE INSTRUMENT ALTITUDES:** Correct Minimum Enroute Altitudes, carried in the Flight Information Manual, Volume 2, Number 2, dated January 1, 1948, as follows:

Airway:	Green 2	From:	Custer	To:	Miles City	Alt.: 4500'
"	Red 1	"	Boise	"	Int.SE leg Boise & W leg Burley	9000'
		"	Int.SE leg Boise & W leg Burley	"	Burley	7000'
"	Red 11	"	Boston	"	East Boston (Int)	1500'
"	Red 12	"	Joliet	"	Int.E leg Joliet & W leg South Bend	2300'
"	Red 21	"	Huntington (Int)	"	Bridgeport	1500'
		"	Bridgeport	"	So.Glastonbury (Int)	2000'
		"	Providence	"	Squantum	1500'
		"	Squantum	"	East Boston (Int)	1500'
"	Amber 1	"	Eugene	"	Medford	6500'
"	Amber 6	"	Macon	"	Atlanta (N-bound)	2200'
		"	Atlanta	"	Macon (S-bound)	2000'
"	Blue 18	"	Albany	"	Vergennes (FM)	4500'
		"	Vergennes (FM)	"	Burlington (N-bound)	2000'
		"	Burlington	"	Vergennes FM(S-bound)	4500'
"	Blue 48	"	Port Chester (Int)	"	Peekskill	2000'
"	Blue 49	"	Carmel (Int)	"	Philadelphia)	1500'
"	Blue 50	"	Oldtown (Int)	"	Canadian Boundary	2500'
Airway:	Blue 51	From:	Goose Creek (Int)	To:	Burley	Alt. 12,000'
			Burley		Int. NE leg Burley & SW leg Pocatello	7000'
			Int. NE leg Burley & SW leg Pocatello		Pocatello	7000'
"	Red 37		Wills Point (Int) (formerly Edgewood Int)		Tyler	1600'
"	Red 38		Mertzon (Int) (formerly Tankersley Int)		Goodfellow	3500'

FLIGHT INFORMATION MANUAL AMENDMENTS AND CORRECTIONS:

1. Chapter VII, "Standard Broadcast Stations", page 89, should be corrected to show call letters for Bowling Green, Ky., as 'WLBJ' instead of WLBU; and tower height as 193'.

Page 89, should be corrected to include Bowling Green, Ky., Call letters: WKCT; Freq. (Kc.): 930; Watts: 1000; Tower location, etc.. 3.2 NE; 38-01-12.6, 86-23-45.6; Tower data, Hgt (ft): 245, Type: A; Hrs. of Operation: LSR-LS.

✓ **AERONAUTICAL CHART AND PUBLICATION CORRECTION:** Correct Civil Airways and Mileage Chart, dated December 10, 1947, as follows: On November 15, 1947, the Miami-Jacksonville boundary on Red Airway No. 25 was changed from 25 miles SE of Fort Myers, Fla., to 50 miles S of Tampa, Fla., and changed on Amber Airway No. 7 from 25 miles S of Melbourne, Fla., to 15 miles N of Melbourne. Coincident with these changes the flight advisory area boundary was revised as follows: "From a point 15 miles N of Melbourne direct to a point on Red Airway No. 25, 50 miles S of Tampa thence direct to a point joining the adjacent coast line at 27°20' N latitude."

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the Airman's Guide, full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of international notams is the C.A.A. Overseas-Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu. Hawaii; Anchorage, Alaska.

UNITED KINGDOM IMPLEMENTATION OF INTERNATIONAL NOTAM PROCEDURES: Effective January 1, 1948, United Kingdom implemented International Notam Procedures, and began broadcast of notams in accordance with plan set up in Dublin Chart, dated November 29, 1947, as amended by United Kingdom telegram of December 8, 1947. listing recent alterations to broadcast plan. Each notam broadcast will be repeated up to end of 24-hour period. Any notam broadcast will be repeated on fixed service channel on request made on that channel.

LONDON, ENGLAND: Pilots entering or operating within this area should be familiar with all notams available at the New York International Notam Office.

N.B. The British Government has reported several violations of local air traffic rules. Disciplinary action will be taken on future violations.

PRECAUTIONS BEFORE ENTERING GREECE: All air carriers and others concerned are advised to use designated International Air Routes in and out of Greece. All pilots should be briefed on international visual signals between aircraft as Greece has indicated they intend to shoot down all intercepted foreign aircraft that are not recognized or fail to comply with instructions when intercepted.

DANGER AREA IN THE VICINITY OF ENIWETOK ATOLL, PACIFIC OCEAN: Effective January 31, 1948, a Danger Area was established in the vicinity of Eniwetok Atoll, about 2400 miles WSW of Honolulu, Hawaii, by the Atomic Energy Commission. The Danger Area, which will be activated throughout the rest of the calendar year 1948, is described as follows:

"Beginning with a point at 10-15 N lat., and 160-35 E long., N along the meridian of 160-35 E long., to a point at 12-45 N lat., 160-35 E long., thence E along the parallel of 12-45 N lat., to a point at 12-45 N lat., and 163-55 E long., thence S along the meridian of 163-55 E long., to a point at 10-15 N lat., and 163-55 E long., thence W to the point of beginning." Because of the grave hazards resulting from tests of military weapons in this area it should be categorically avoided under all circumstances until further notice.

EL-ARISH AIRPORT, EGYPT DANGER AREA: Anti-aircraft and air firing practice is being conducted continuously day and night until further notice within an area of 25 mile radius centered on El-Arish Airport at lat. 31-00 N lat., and 33-50 E long. All aircraft must avoid this area.

PERUVIAN PROHIBITED AREAS: The President of Peru has decreed that flight is prohibited over the following zones: Callao - lat. 12-02, long. 77-16, to lat. 12-02, long. 77-08; to lat. 12-08, long. 77-08; to lat. 12-08, long. 77-17. Pisco - lat. 14, long. 76-28, to lat. 14, long. 76-14; to lat. 14-14, long. 76; to lat. 14-25, long. 76; to lat. 14-25, long. 76-28. Matarini - lat. 16-54, long. 72-15; to lat. 16-54, long. 72-05; to lat. 17-05, long. 72-05; to lat. 17-05, long. 72-15.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

ALABAMA: CENTRE ARPT: NNW/SSE strip closed. N side E/W strip rough. (10-14)

BIRMINGHAM-RADIO: VHF omni rng without voice on test basis, unmonitored, subject to interruptions, and not to be used for navigational purposes. Freq. 116.3 mcs, ident. "BH". (2-25)

★BIRMINGHAM ARPT-RADIO: CAA ILS without voice feature flgt-checked and comm Feb. 16, with approach from SW serving NE/SW rnwy. Lclzr lctd 650' from NE end NE/SW rnwy. Glide path lctd 800' NE of SW end NE/SW rnwy. See ILS page. Glide path angle 2.5°.

JASPER-WALKER CO. ARPT: Land inside of bndry mrkrs. Avoid new strip-being graded. (10-14)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-RADIO: VHF omni-directional rng in cont oper on 113.1 mcs. Ident. "MS". Comm. on test basis, fac unmonitored, subject to interruptions and not to be used for navigational purposes. (1-21) Auto. rng monitor. sys inop. (2-8)

MOBILE-BATES FLD: N/S rnwy lgts inop. Equip. on fld. (1-7)

MONTGOMERY-RADIO: VHF omni-directional rng comm on test basis, unmonitored, unattended and subject to interruptions, not to be used for navigational purposes. Ident. "TDN", freq. 112.1 mcs. (12-8)

**TUSCALOOSA-VAN DE GRAAFF FLD, SITE 59, FV-AC: Three 210' obst lgtd twrs Rdo Stn WJRD erected 1.5 mi N (34° true) at lat 33-15-02, long. 87-36-35. (2-18)

ARIZONA: **CHANDLER-WIGGINS ARPT: New fld. Lat. 33-18-00, long. 111-49-00. (1-8)

COCHISE-RADIO: About Mar. 12, rcvg watches, weather reporting and associated commns service will be discont. Rng and stn lctn mrkr will continue in oper as an independent fac (2-27)

**CORDES ARPT: New fld. Lat. 34-18-30, long. 112-09-30. (2-13)

DAVIS MONTHAN AFB (TUCSON): E fld closed-acft parked on rnwys. Obst lgt inop on 75' pole SE of twr. Former taxi strips 12R and 30L are now open as Rnwy 12R-30L, to be used by lgt acft and rstd to day opers only. (2-26)

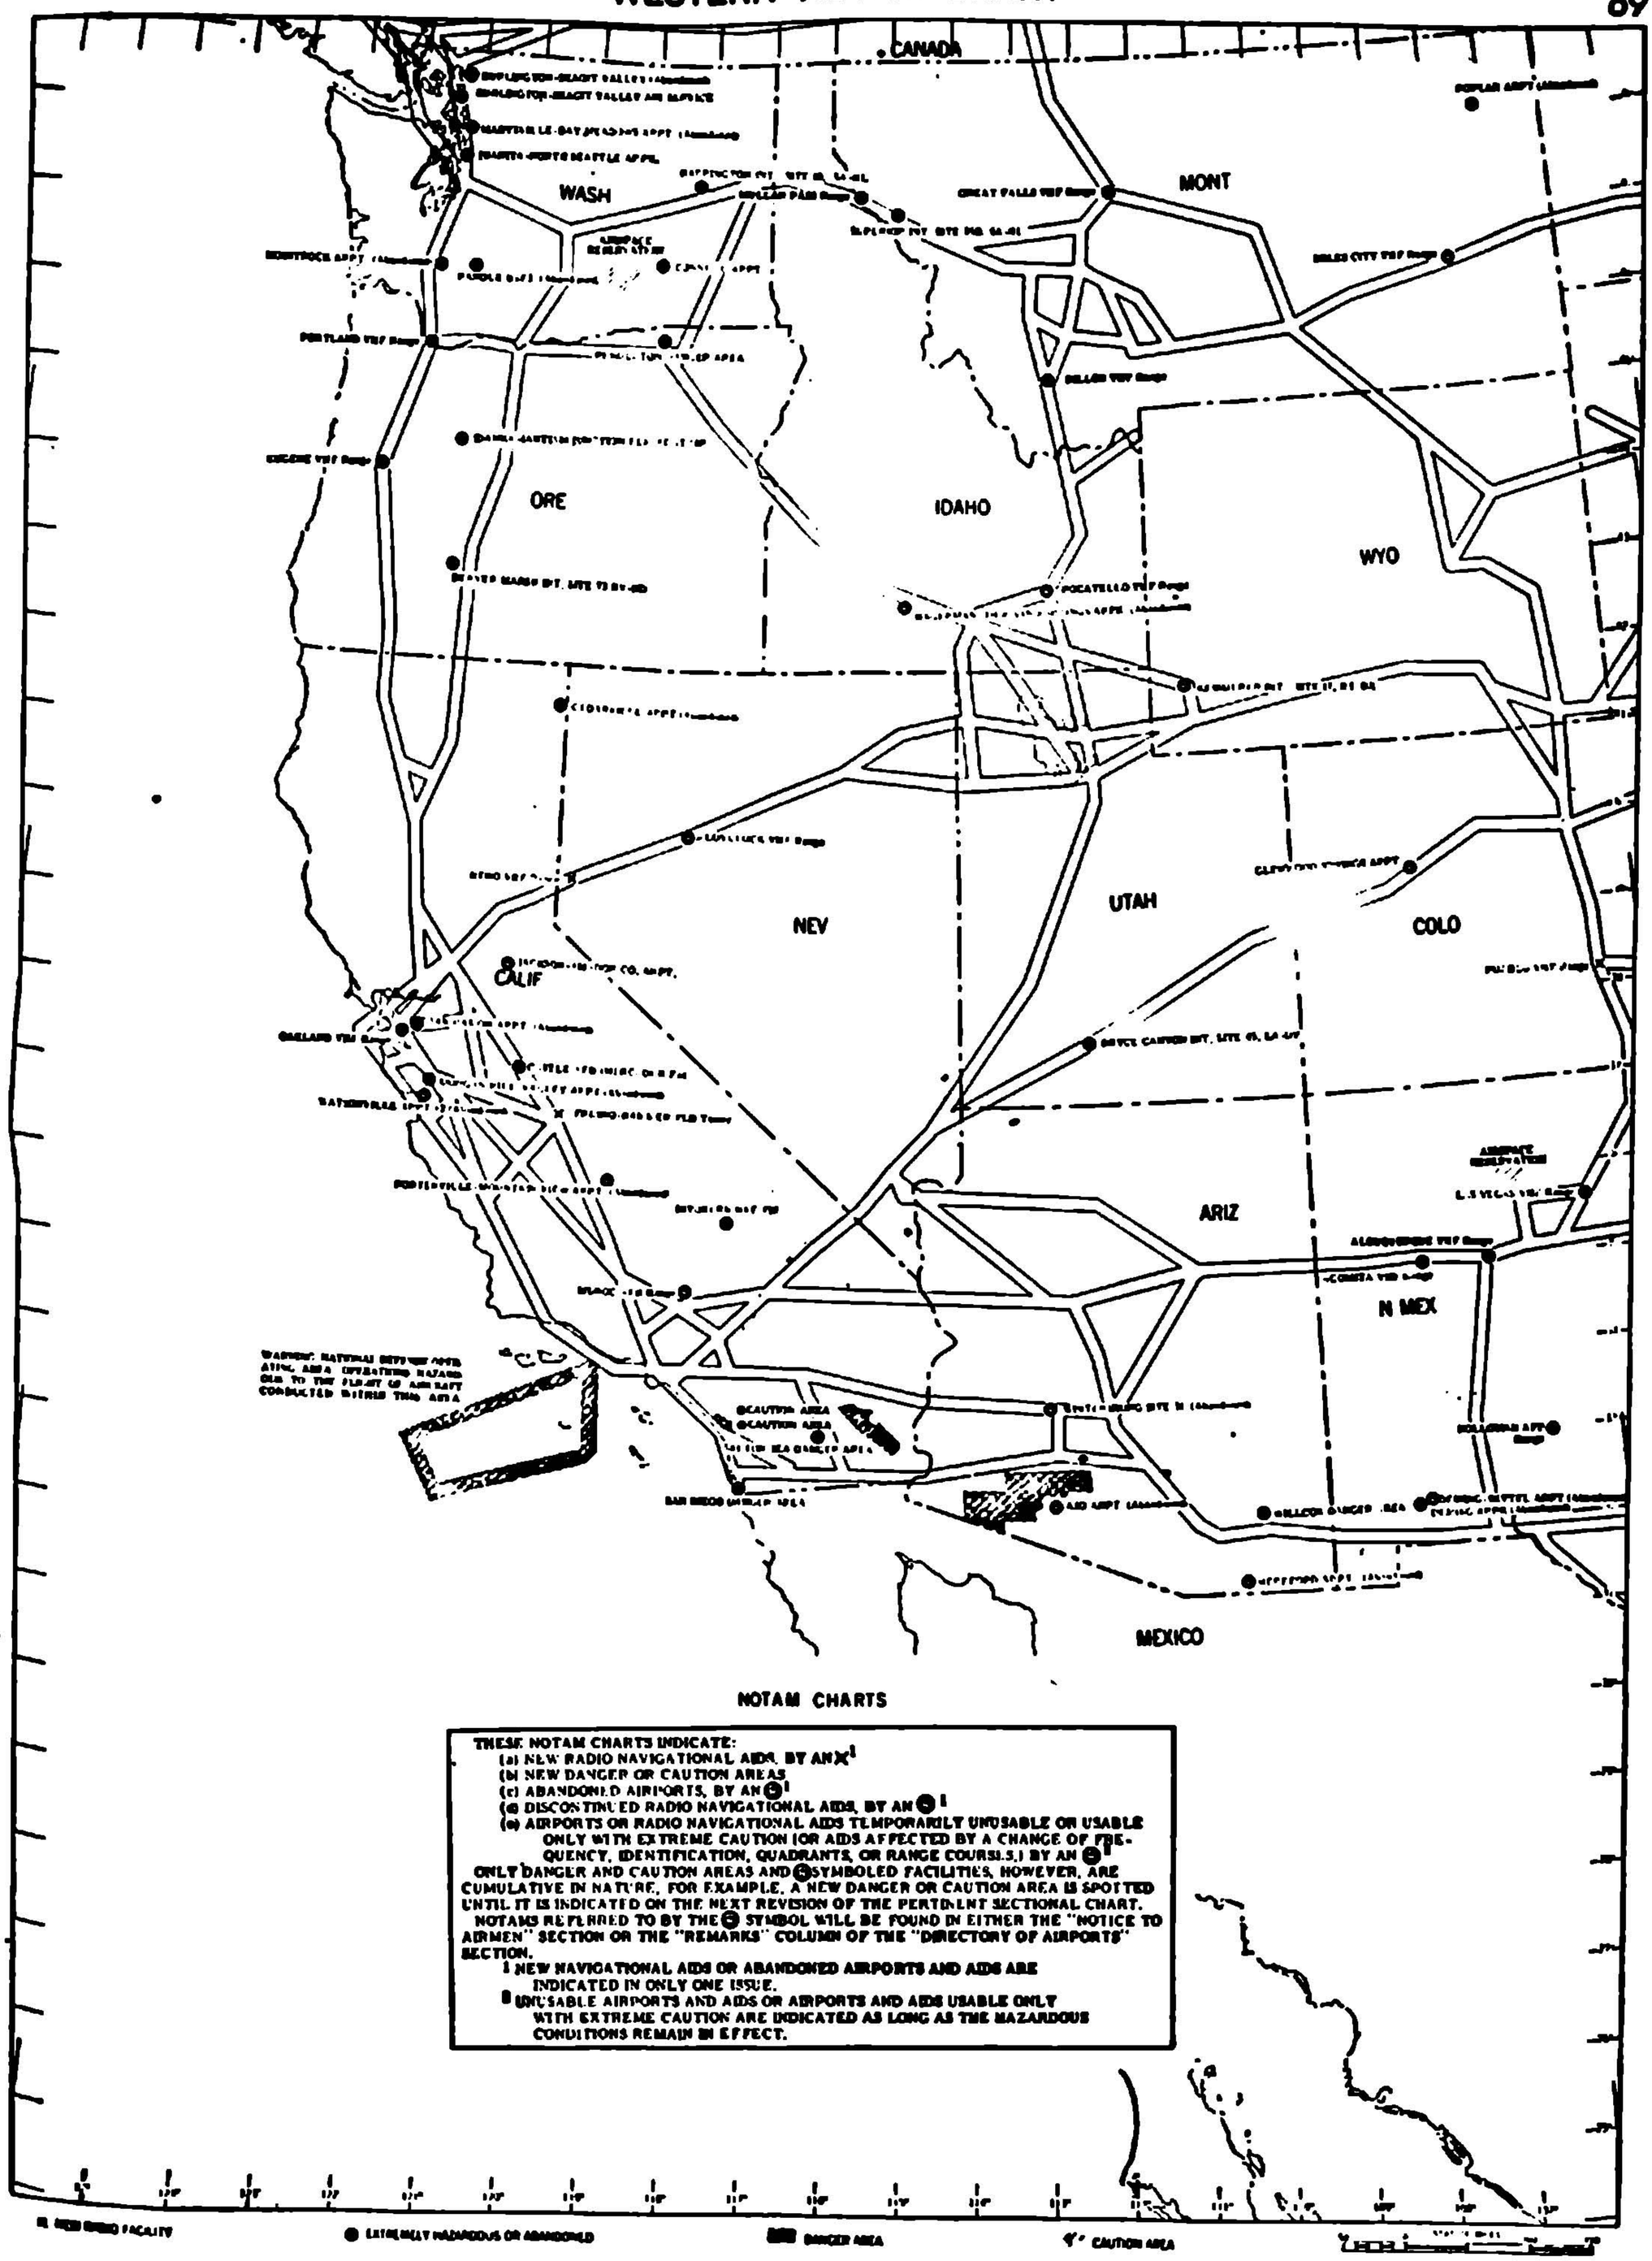
SHERIDAN-RADIO: About Feb 23, VHF omni rng will be comm on test basis. Fac will be interrupted for adjustment and installation of adtnl equip. Stn lctn: lat44-50-30, long. 107-03-30. Elev. 4320' MSL. Bear. and dist, stn to Sheridan Mun. Arpt. 122°, 5.8 mi. Freq.113.3mcs, ident. "ZY". Associated INSAC lctd at Sheridan, Wyo. Dec16°E. (2-5)

SHERIDAN CO. ARPT: N/S rnwy unsafe hvy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. (2-23)

WESTERN NOTAM CHART



NOTAM CHARTS

THESE NOTAM CHARTS INDICATE:

(a) NEW RADIO NAVIGATIONAL AIDS, BY AN X[1]
(b) NEW DANGER OR CAUTION AREAS
(c) ABANDONED AIRPORTS, BY AN ⊖[1]
(d) DISCONTINUED RADIO NAVIGATIONAL AIDS, BY AN ⊖[1]
(e) AIRPORTS OR RADIO NAVIGATIONAL AIDS TEMPORARILY UNUSABLE OR USABLE ONLY WITH EXTREME CAUTION (OR AIDS AFFECTED BY A CHANGE OF FREQUENCY, IDENTIFICATION, QUADRANTS, OR RANGE COURSES,) BY AN ⊖[1]

ONLY DANGER AND CAUTION AREAS AND ⊖ SYMBOLED FACILITIES, HOWEVER, ARE CUMULATIVE IN NATURE. FOR EXAMPLE, A NEW DANGER OR CAUTION AREA IS SPOTTED UNTIL IT IS INDICATED ON THE NEXT REVISION OF THE PERTINENT SECTIONAL CHART.

NOTAMS REFERRED TO BY THE ⊖ SYMBOL WILL BE FOUND IN EITHER THE "NOTICE TO AIRMEN" SECTION OR THE "REMARKS" COLUMN OF THE "DIRECTORY OF AIRPORTS" SECTION.

[1] NEW NAVIGATIONAL AIDS OR ABANDONED AIRPORTS AND AIDS ARE INDICATED IN ONLY ONE ISSUE.

[2] UNUSABLE AIRPORTS AND AIDS OR AIRPORTS AND AIDS USABLE ONLY WITH EXTREME CAUTION ARE INDICATED AS LONG AS THE HAZARDOUS CONDITIONS REMAIN IN EFFECT.

G C A A V A I L A B L E: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF. Most GCA units can transmit instructions directly on tower low frequency. Those identified by a (&) are forced to relay instructions on tower low frequency, if low frequency required.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

CAA GCA UNITS

N.B. It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the above tabulation.

* = Test basis-not to be used for navigation. + = voice on 111.1 and 116.1 mcs. - = voice on 111.1 mcs but not on 116.1 mcs.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A - U.S. Air Force
C - Commercial
CG - Coast Guard
I - Intermediate
M - Municipal
N - Navy
NG - National Guard
P - Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
S-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet.

"h" indicates landing area is hard-surfaced or paved.
"aw" indicates allway field.

No differentiation is made between runways and strips as far as number of landing areas in field is concerned. In other words, two hard-surfaced runways and two sod surfaced strips will be listed as four runways.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

LIGHTS

L : Incomplete lighting, such as flood or strip lights, which are generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

(Any S combination in parenthesis indicates only part time or irregular attendant)

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS

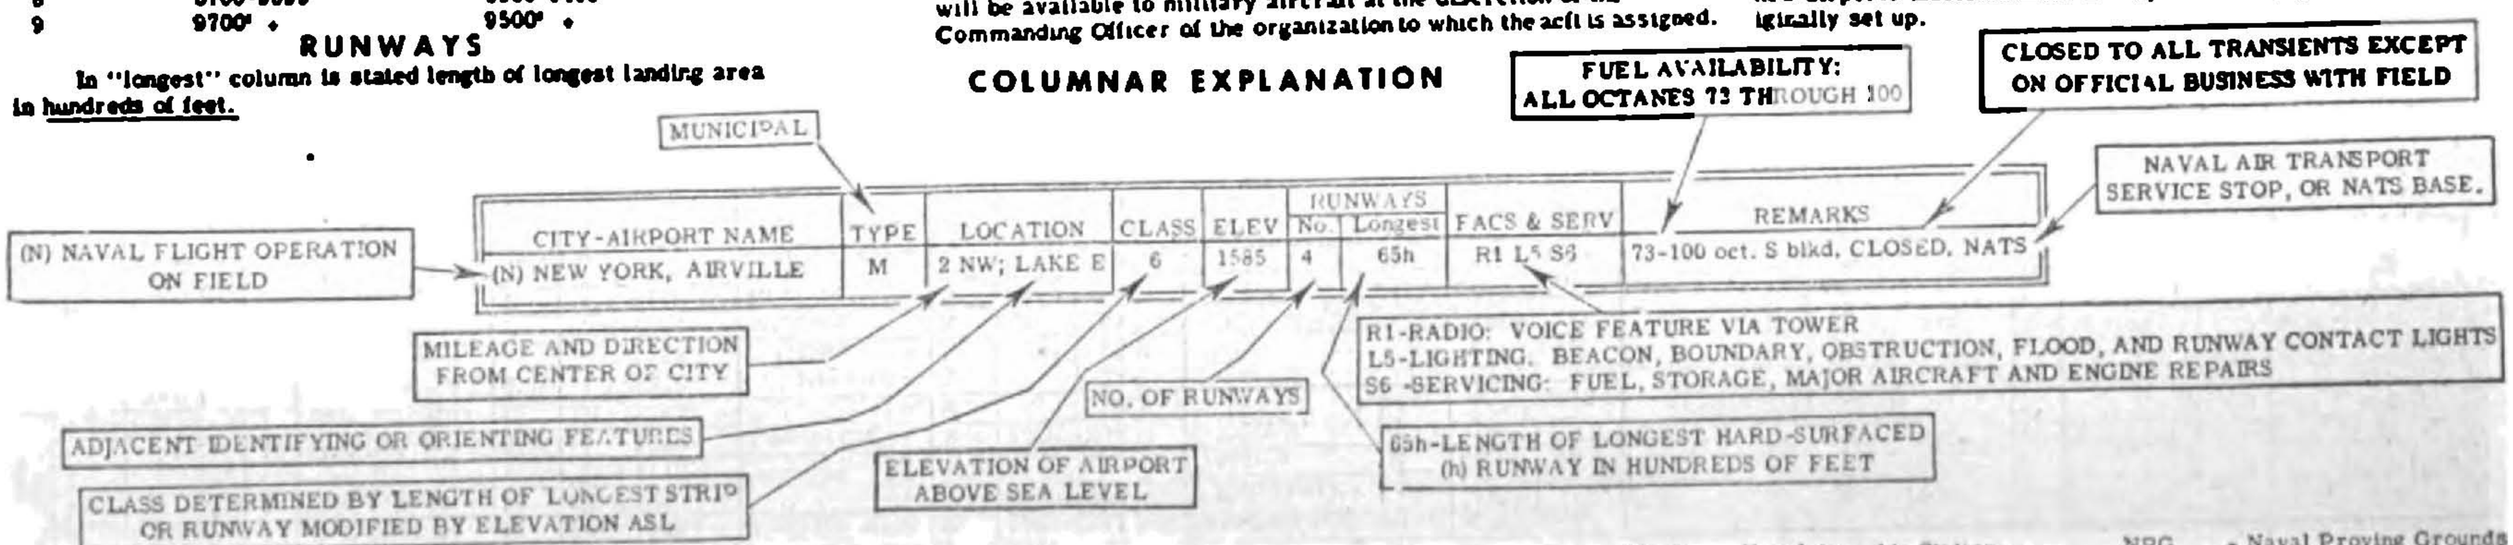
(a) "91 oct." indicates fuel octanes available. "AF" , or "Navy", preceding octane indicates USAF or Navy contract fuel available.
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or strips.
(d) "TEMP INACT.NO FACS." indicates USAF and/or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.
(e) "USAF and NAVY TEMP INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Fld lights on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, LS-ID" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION



AIRPORT NAME ABBREVIATIONS

AFB - U.S. Air Force Base
AFF - U.S. Air Force Field
CGAS - Coast Guard Air Station

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, Attention: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, U.S.A.F. aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA & AZORES - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass. ALASKA - McChord AFB, Wash., or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y., Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass., or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont., Brookley AFB, Ala., McChord AFB, Wash., Washington National Airport, D.C., Selfridge AFB, Mich., or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, & SOUTH AMERICA - March AFB, Calif., MacDill AFB, Fla., Kelly AFB, Tex., or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala., Kelly AFB, Tex., or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, & NORTH IRELAND Washington National Airport, D.C., or Westover AFB, Mass. NOVA SCOTIA & NEWFOUNDLAND - Washington National Airport, D.C., Westover AFB, Mass., Selfridge AFB, Mich., or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.86	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

✓ Indicates new or revised Special Notices

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force Fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation "AF Aux." stands for Air Force Auxiliary Field and the abbreviation "AFB" is for Air Force Base.

POLICY ON CONTROL TOWER PROCEDURE: Base Commanding Officers at bases where the tower is operated by CAA will discontinue requesting the tower to determine the highest rank aboard incoming aircraft. This action is taken in an attempt to curtail the congested communications situation and at the request of CAA. In case of VIP, the desired information will be transmitted from point of departure to destination in the flight plan.

✓ UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MCS) The attention of all operations officers and pilots is invited to AF Letter 100-31, of January 13, 1948, subject, "Unauthorized Use of VHF Emergency Frequency (140.58 mcs.)"

✓ CORRECTIONS FOR AND ADDITIONS TO USAF T.O. 08-15-1:

(1) Correct page 114, "List of Proper Voice Radio Procedure for Position Reporting, Change of Flight Plan and Clearance from Non-USAF Bases", by adding the following item under paragraph D: '(7). Temperature (C)'.

(2) Correct page 20, by showing the bearing, station to field for Portland as 171°.

(3) Correct page 32, by showing the hours of operation of Whidbey Island, Wash. facility, as on request on 30 minutes notice.

(4) Correct page 32, by showing the operation of West Palm Beach, Fla. facility as unreliable.

(5) Correct Canadian data as follows: Ernest Harmon AFB, Nfld, GCA facility hours of operation: Cont. during IFR; 1100Z to 2000Z for practice.

(6) Correct listing under Atlantic City NAS, N.J., remarks to show GCA available.

✓ CHANGE FOR USAF T.O. 08-15-2: Correct Cherry Point, N.C. AN/CPN-6 (YM) Beacon (X-Band) Domestic code, by changing to: 2-1-2-1.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviator No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the C.A.A. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

RESTRICTIONS ON NAVAL AIRCRAFT AT LAGUARDIA FIELD, INTERNATIONAL AIRPORT, AND NEWARK AIRPORT: La Guardia Field, N.Y., New York International Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers guard the private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies in the 118.3 to 121.3 mcs band as cited in the "Transmitting Frequencies and Identifiers" listing on Page VI.

INSTRUMENT LANDING SYSTEM (ILS) APPROACHES: Effective March 15, 1948, pilots are requested to give advance information to Air Traffic Control when planning to make an ILS approach, upon reaching the reporting point preceding the holding fix at airport of intended landing. This will permit assignment to the proper holding pattern and eliminate unnecessary delays in landing. Failure to use this procedure, however, will not preclude the pilot's right to request an ILS approach after reaching the holding point if weather conditions or other factors make such request advisable.

ON-REQUEST REPORTING POINTS: (1) The following "On-Request" Reporting Points have been established as follows:

Key West Intersection (Intersection of the E course of Key West and the SE course of Miami, Fla. radio range stations). Location identifier: "KWX".

Gingerbread Intersection (Intersection of the E course of Miami, Fla., and the NE course of Nassau, B.W.I. radio range stations). Location identifier: "GBI".

Waterloo Intersection (Intersection of the S course of St. Louis and the SW course of Scott Field radio range stations). Location identifier: "WLX". (This corrects Airman's Guide, Vol. 2, No. 25, dated March 2, 1948).

Belton Intersection (Intersection of the SE course of Kansas City LF and the E course of Olathe LF radio range stations). Location identifier: "BEX".

Maple Hill Intersection (Intersection of the NW course of Topeka (AFF) LF and the W course (visual) of Topeka VAR radio range stations). Location identifier: "MHX".

Lynnville Intersection (Intersection of the E course of Des Moines LF and the NW course (visual) of Ottumwa VAR radio range stations). Location identifier: "LNV".

Luray Intersection (Intersection of the SE course (visual) of Ottumwa VAR and the SW course of Burlington LF radio range stations). Location identifier: "LRX".

De Soto Intersection (Intersection of the SW course of Kansas City LF and the N course of Olathe (Navy) radio range stations). Location identifier: "DSO".

Braymer Intersection (Intersection of the NE course of Kansas City LF and the E course of St. Joseph LF radio range stations). Location identifier: "BMR".

(2) The following "On-Request" Reporting Points have been revised as follows:

Cassoday Intersection (Intersection of the W course of Chanute, Kans LF and the NE course of Wichita, Kans. radio range stations). Location identifier: "CDY". (Formerly El Dorado Intersection; change required due to realignment of the W course of Chanute, Kans. LF radio range).

Danville Intersection (Intersection of the S course of Hutchinson LF and the SW course of Wichita LF radio range stations). Location identifier: "DVI". (Formerly Anthony Intersection; change required due to realignment of the S course of the Hutchinson radio range).

(3) The following "On-Request" Reporting Point has been deleted as follows:

Eudora Intersection (Intersection of the SW course of Kansas City LF and the N course of Chanute LF radio range stations). Location identifier: "EUD" has been cancelled.

CONTROL AREA BOUNDARIES: (1) Effective March 15, 1948, the Cleveland-New York Air Route Traffic Control Area Boundary on Green Airway #3 was relocated from 25 miles W of Phillipsburg, Pa. radio range station to 5 miles W of Brooksville, Pa. radio beacon station.

(2) Effective March 15, 1948, concurrent with the designation of Red Airway #67, the control boundary between New Orleans and Jacksonville ATC Centers was located 25 miles SW of Dothan.

AERONAUTICAL CHART AND PUBLICATION CORRECTION: Correct Radio Facility Charts 24 and 27, dated January 28, 1948, by showing the correct freq.KGGM of Albuquerque, New Mexico, as 610 kcs.

FLIGHT INFORMATION MANUAL AMENDMENTS AND CORRECTIONS: (1) Correct pages 179 and 180, "Detailed Procedure for U.S. Flights To and From Mexico", by changing heading from Canada to Mexico, and by shifting items 6,7,8, and 9 under paragraph B.2. to correct sequence under paragraph A.1.c.

(2) Correct page 69, "Direction Finding (D/F) and Loran Station Data", by deleting Minneapolis, Minn. (Not yet installed)

(3) Correct page 92, "Standard Broadcast Stations", Albuquerque, N. Mex., by showing the Tower Location, Mileage and Direction from Center of City, Latitude and Longitude as 4 S; 35-01-56, 106-39-48, for KGGM Towers.

(4) Correct page 62 and 64, "Overseas Foreign Aeronautical Communication Stations (OFACS)", by substituting the following information for data carried therein:

STATION	FREQUENCIES TRANSMITTING	FREQUENCIES RECEIVING	TYPE EMISSION	REMARKS
Balboa (Canal Zone)	3057.5,5215,8070, 11910,3082.5,126.9	3057.5,5215, 8070,11910,3082.5 126.9	Voice	Balboa-Havana-New Orleans route

	3248,6523	3248,6523	CW	All routes
New Orleans	2968,6490	2968,6490	Voice	New Orleans-Merida route
	3082.5.5692.5	3082.5,5692.5	Voice	On request
	2870, 6515	2870, 6515	Voice	Cont. ICAO Regional air-ground
	3248, 6523	3248, 6523	CW	Cont. ICAO Regional air-ground

C.A.A. TOWER VHF TRANSMITTING FREQUENCY CHANGES: Between the hours 0001, local time, March 31, 1948, and 2400, local time, March 31, 1948, the VHF transmitting frequency at the CAA Airport Traffic Control Tower Stations listed below will be changed to the channels indicated opposite each location. It is expected that the changeover will be accomplished in less than the 24 hour period and service restored on the new frequency. However, since unforeseen circumstances may cause delays, VHF airport control communication service in the frequency band 118.3-121.3 mcs will not be guaranteed at these locations during the above period.

✓ AIR FORCE-CAA AGREEMENT ON CONTROL OF IFR TRAFFIC IN THE WASHINGTON METROPOLITAN AREA: (1) Joint Air Force and CAA procedures have been established, and are effective March 15, 1948, to expedite movement of IFR traffic in the Washington Area. Detailed information on these procedures is contained in Washington Air Route Traffic Control Center Operations Letter No. 9 and No. 3 and in Andrews Air Force Base Approach Control Operations Letter No. 1, available from the agencies named above.

(2) These procedures establish a second method of approach in the Washington Area utilizing radar approach control from the Brandywine Range to Andrews Field. Aircraft may be routed for approach to these procedures on request or with the pilots concurrence. To facilitate operation of these procedures Andrews Field, Bolling Field, and Washington National Airport have been designated as co-terminals with respect to in-bound Air Force aircraft on IFR. This designation as co-terminal does not abrogate or alter existing restrictions on Washington National Airport landings. When delays are encountered in approach times under procedures on the Washington range pilots may be routed with concurrence to make approaches on the Brandywine or Andrews ranges using either normal procedures, radar control, GCA or a combination of all.

(3) All pilots and base operations officers clearing into the Washington Area are advised to become familiar with these procedures.

✓ THREE-LETTER IDENTIFIER KEYING CHANGEOVER: The three-letter identifier keying changeover has been accomplished at the following stations: (See Flight Information Manual for assignment)

Alabama: Birmingham (LFR VHFR ILS); Craig AFB (R); Mobile (LFR VHFR); Tuscaloosa (H)

Arizona: Cochise (R); Gila Bend (R); Phoenix (LF VHF R); Prescott (R); Winslow (LFR VHFR ILS); Yuma (R)

Arkansas: Blytheville (R); Stuttgart (R); Texarkana (R)

California: Bakersfield (R ILS); Blythe (R); Burbank (R); Castle AFB (H); Chatsworth (H); Daggett (R); Downey (H); El Centro (R); Evergreen (H); Farallon Island (H); Fort Jones (R); Fresno (R); Glendale (H); Indio (R); Long Beach (R ILS); Los Angeles (LFR VHFR); Mt. Laguna (H); Mount Shasta (R); Needles (R); Newark (H); Oakland (LFR, VHFR, ILS); Oceanside (H); Palmdale (R); Paso Robles (VHF R); Red Bluff (R); Riverside (R); Sacramento (R); Salinas (LFR VHFR); Santa Barbara (LFR VHFR); San Diego (R); Silver Lake (R); Stockton (R); Williams (R); Whitmore (R); Newhall (R)

Caribbean: Swan Island (H)

Colorado: Akron (R); Denver (ILS); Grand Junction (ILS VHFR); La Junta (R); Thurman (VHFR)

Dist. of Columbia: Washington (ILS R)

Connecticut: Bradley Field (ILS), Compass locator B; Bridgeport (R)

Florida: Crestview (R); Cross City (R); Ft. Myers (R); Key West (R); Melbourne (R); Orlando (R); Jacksonville (LFR VHFR ILS)

Georgia: Augusta (LFR VHFR); Lawson (R); Macon (LFR VHFR)

Hawaii: Hilo (R); Honolulu (R); Port Allen, Kauai (R); Puunene Maui (R)

Idaho: Boise (ILS R); Burley (R); Coeur D'Alene (R); Gooding (H); Idaho Falls (R); Malad City (R); Pocatello (R); Strevell (H); Dubois (R)

Illinois: Chanute AFB (R); Chicago (ILS); Joliet (R)

Iowa: Burlington (LFR VHFR); Des Moines (VHFR ILS); Mason City (H)

Kansas: Dodge City (H); Emporia (VHFR); Topeka AFB (R); Wichita (VHFR ILS)

Kentucky: Bowling Green (R); Covington-Greater Cincinnati (ILS)

Louisiana: Alexandria (R); Barksdale AFB (R); Baton Rouge (R); Lake Charles (R); New Orleans-Moisant (ILS)

Maine: Augusta (R); Bangor (R); Millinocket (R); Portland (R); Sprague ville (R); Presque Isle (R)

Maryland: Baltimore (R)

Massachusetts: Boston (R); Westover AFB (R)

Michigan: Grand Marais (R); Selfridge AFB (R) Jackson (LFR VHFR ILS)

Mississippi: Greenwood (R); Keesler AFB (R); Meridian (ILS VHFR); Vicksburg (H)

Missouri: Columbia (VHFR); Joplin (R); Kans. City (ILS LFR VHFR); Kirksville (VHFR); St. Louis (VHFR ILS); Springfield (VHFR); Tarkio (H); Vichy (VHFR)

Montana: Billings (ILS R); Bozeman (R); Custer (R); Cut Bank (R); Dillon (R); Drummond (R); Helena (R); Livingston (R); Mullan Pass (R); Superior (R); Whitehall (R)

Nebraska: Chadron (H); Kearney AFB (H); Omaha (VHFR ILS); Sidney (VHFR)

Nevada: Battle Mtn (R); Elko (R); Fallon (R); Las Vegas (LFR VHFR ILS); Reno (R); Tonopah (R)

New Hampshire: Concord (R)

New Jersey: Newark (ILS R)

New Mexico: Acomita (R); Albuquerque-Kirtland (ILS); Carlsbad (R); Columbus (LFR VHFR); Engle (R); Hobbs (R); Las Vegas (R)

New York: Albany (R); Buffalo (R); Dunkirk (H); Flatbush (H); Floyd Bennett (R); La Guardia (R ILS); Mitchel AFB (R); Idlewild (R)

North Carolina: Asheville (VHFR); Charlotte (R); Greensboro (LFR VHFR); Hickory (VHFR); Pope AFB (R); Lumberton (H)

North Dakota: Grand Forks (R)

Ohio: Cincinnati (R); Clinton Co. AFB (ILS); Dayton (R ILS); Findlay (H); Toledo (VHFR); Wright-Patterson AFB/Patterson (R); Youngstown (LFR VHFR)

Oklahoma: Gage (R); Oklahoma City Will Rogers (ILS); Tulsa (ILS); Ardmore (R ILS)

Oregon: Baker (R); Eugene (ILS R); Medford (R); North Bend (R); Ontario (H); Pendleton (R); The Dalles (R)

Pacific Ocean: Canton Island (R H); Palmyra Island (R H)

Pennsylvania: Allentown (R); Altoona (R); Philadelphia - SW (ILS); Sunbury (H)

Puerto Rico: San Juan (R)

South Carolina: Florence (R); Greenville (R); Myrtle Beach (VHFR)

South Dakota: Philip (H); Sioux Falls (R)

Tennessee: Dyersburg (VHFR); Jacks Creek (R)
Texas: Abilene (LFR VHFR) Alice (R); Amarillo (ILS): Big Spring (LFR VHFR): Brownsville (ILS); Clarendon (R); Dallas (ILS); Fort Worth (ILS): Houston (ILS); Laredo (R); Midland(LFR VHFR);San Angelo (R): San Antonio-Alamo (ILS); San Antonio-Kelly (R); San Marcos AFB (R); Tyler (R) ; El Paso (VHFR ILS)
Utah: Bryce Canyon (R); Delta (R); Hanksville (VHFR); Lucin (R); Milford (R); Ogden (I St.George (VHFR); Salt Lake City (R ILS); Wendover (R) ; Enterprise (R); Fairfield (R)
Vermont: Burlington (R); Montpelier (R)
Virginia: Front Royal (R); Langley (R); Lynchburg (R); Norfolk (LFR VHFR);Roanoke(R)
Washington: Bellingham (R); Ellensburg (R); Ephrata (R); Seattle (R); Neah Bay (R); Toledo (R); Seattle-Tacoma (VHFR); Yakima (R)
West Virginia: Elkins (R); Martinsburg (R); Morgantown (R); Wheeling (VHFR)
Wyoming: Casper (R); Cheyenne (ILS LFR VHFR): Douglas (H); Ft.Bridger(R);Rock Springs (ILS)
Indiana: McCool (H)

N.B. (R) indicates low frequency range. (LFR) indicates low frequency range when combined with (VHFR)-very high frequency range.

N.B. This listing includes all changes, amendments or corrections carried in Volume 2, Numbers 23 and 24.

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of international notams is the CAA Overseas-Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, C.Z.; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii; Anchorage, Alaska.

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations are now incorporated into the Flight Information Manual. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

LONDON, ENGLAND: Pilots entering or operating within this area should be familiar with all notams available at the New York International Notam Office.

N.B. The British Government has reported several violations of local air traffic rules. Disciplinary action will be taken on future violations.

IRELAND, SHANNON AIRPORT: Because control tower and other facilities at Shannon Airport were destroyed by fire, all aircraft expecting to land there will use GCA facility.

CLEARANCE OF NON-SCHEDULED FLIGHTS TO COSTA RICA: The Government of Costa Rica does permit irregular air carriers to make direct application for flight permits through its consular offices in the United States. Applicants who apply directly to the Government in San Jose, Costa Rica are referred back to a Costa Rican consular office in the United States.

Also, the Government of Costa Rica accepts applications for flight permits which have come through United States diplomatic channels, i.e., the Department of State and the American Embassy.

PRECAUTIONS BEFORE ENTERING GREECE: All air carriers and others concerned are advised to use designated International Air Routes in and out of Greece. All pilots should be briefed on international visual signals between aircraft as Greece has indicated they intend to shoot down all intercepted foreign aircraft that are not recognized or fail to comply with instructions when intercepted.

DANGER AREA IN THE VICINITY OF ENIWETOK ATOLL, PACIFIC OCEAN: Effective January 31, 1948, a Danger Area was established in the vicinity of Eniwetok Atoll, about 2400 miles WSW of Honolulu, Hawaii, by the Atomic Energy Commission. The Danger Area, which will be activated throughout the rest of the calendar year 1948, is described as follows:

"Beginning with a point at 10-15 N lat., and 160-35 E long., N along the meridian of 160-35 E long., to a point at 12-45 N lat., 160-35 E long., thence E along the parallel of 12-45 N lat., to a point at 12-45 N lat., and 163-55 E long., thence S along the meridian of 163-55 E long., to a point at 10-15 N lat., and 163-55 E long., thence W to the point of beginning." Because of the grave hazards resulting from tests of military weapons in this area it should be categorically avoided under all circumstances until further notice.

EL-ARISH AIRPORT, EGYPT DANGER AREA: Anti-aircraft and air firing practice is being conducted continuously day and night until further notice within an area of 25 mile radius centered on El-Arish Airport at lat. 31-00 N lat., and 33-50 E long. All aircraft must avoid this area.

PERUVIAN PROHIBITED AREAS: The President of Peru has decreed that flight is prohibited over the following zones: Callao - lat. 12-02, long. 77-16, to lat. 12-02, long. 77-08; to lat. 12-08, long. 77-08; to lat. 12-08, long. 77-17. Pisco - lat. 14, long. 76-28, to lat. 14, long. 76-14; to lat. 14-14, long. 76; to lat. 14-25, long. 76; to lat. 14-25, long. 76-28. Matarini - lat. 16-54, long. 72-15; to lat. 16-54, long. 72-05; to lat. 17-05, long. 72-05; to lat. 17-05, long. 72-15.

AIRPORT AND RADIO NOTICES

LEGEND

•• - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

[redacted]: BIRMINGHAM: Rdo rcvr rqrd. Sod unsafe when wet. Ctn ngts or under IFR plant S of fld has long taxi and parking strips resembling rnwys. (3-9)

DOTHAN-RADIO: About Mar 22, SW course will be realigned from 47° to 63°. (3-2)

JASPER-WALKER CO. ARPT: Avoid new strip being graded. (10-14)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-RADIO: Auto. rng monitor. sys inop. (2-8)

MOBILE-BATES FLD: N/S rnwy lgts inop. Equip. on fld. (1-7)

[redacted]: ★COCHISE-RADIO: Mar. 12, rcvg watches, teletype, weather reporting and voice communs svc discont. Rng and stn lctn mrkr will cont. in oper. Class: MRAWZ.

DAVIS MONTHAN AFB (TUCSON): E fld closed-acft parked on rnwys. Obst lgt inop on 75' pole SE of twr. Former taxi strips 12R and 30L are now open as Rnwy 12R-30L, to be used by lgt acft days only. (2-26)

DOUGLAS-RADIO: MRLW fac will be comm soon at lat 31-30-19.8, long. 109-39-20.4. Freq. 379 kcs, ident. "DUG". Courses: 60°,120°,230°,300°. Var 14° E. Bear. and dist, stn to fld: 120°, 3 mi. (2-17). About Mar 12, voice and bdcast fac will be comm. (3-11)

PHOENIX-RADIO: Visual courses of VHF rng unmonitored.

PHOENIX: Inst training on Phoenix Rng between 5500' and 9500'.

PHOENIX-SKY HARBOR ARPT: Equip. on fld. (10-3)

ROOSEVELT-RADIO: About Mar 23, special purpose 2-course VHF aural rng, privately owned will be comm on 110.7 mcs, approx 10 mi W of Roosevelt at lat 33-41-00, long. 111-25-00. Call letters: "KAJE". Irregular hrs of oper, but chiefly during daylgt hrs. Freqs to be guarded 122.1, 122.5 mcs. Stn not to be used for navigation. (3-11)

••WILLCOX: Danger area estab. for bombing from the surface up to and including an alt of 30,000' during daylgt and darkness. The area is bounded on the N by lat 32-14; S by lat.

[redacted]: 32-06-30; E by long. 109-39; W by long. 110-00-30.
WILLIAMS AFB (CHANDLER)-RADIO: USAF rng unreliable and to be used for training only. (2-3)
WINSLOW-RADIO: Visual-aural rng unmonitored, unattended.
[redacted]: BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (10-17)
FORT SMITH ARPT: W end NW/SE, N end NE/SW rnwys closed. Equip. on fld, lgtd. Taxi strip connecting E/W rnwy with Terminal Bldg closed to acft over 5000 lbs. (2-18)
••HORATIO ARPT: New fld. Lat. 33-56, long. 94-21. (8-7)
HOT SPRINGS-MEMORIAL ARPT: Use rnwys only. (10-23)

(d) DISCONTINUED RADIO NAVIGATIONAL AIDS, BY AN (A)[1]

(e) AIRPORTS OR RADIO NAVIGATIONAL AIDS TEMPORARILY UNUSABLE OR USABLE ONLY WITH EXTREME CAUTION (OR AIDS AFFECTED BY A CHANGE OF FREQUENCY, IDENTIFICATION, QUADRANTS, OR RANGE COURSES). BY AN (A)[2]

ONLY DANGER AND CAUTION AREAS AND (A) SYMBOLED FACILITIES, HOWEVER, ARE CUMULATIVE IN NATURE. FOR EXAMPLE, A NEW DANGER OR CAUTION AREA IS SPOTTED UNTIL IT IS INDICATED ON THE NEXT REVISION OF THE PERTINENT SECTIONAL CHART.

NOTAMS REFERRED TO BY THE (A) SYMBOL WILL BE FOUND IN EITHER THE "NOTICE TO AIRMEN" SECTION OR THE "REMARKS" COLUMN OF THE "DIRECTORY OF AIRPORTS" SECTION.

[1] NEW NAVIGATIONAL AIDS OR ABANDONED AIRPORTS AND AIDS ARE INDICATED IN ONLY ONE ISSUE

[2] UNUSABLE AIRPORTS AND AIDS OR AIRPORTS AND AIDS USABLE ONLY WITH EXTREME CAUTION ARE INDICATED AS LONG AS THE HAZARDOUS CONDITIONS REMAIN IN EFFECT. VOR OR VAR RANGES ON-TEST BASIS AND NOT TO BE USED FOR NAVIGATION ARE INCLUDED IN THE FREQUENCY AND IDENTIFICATION TABULATION ON PAGE VI AND PREFIXED BY AN ASTERISK.
